Introduction

Introduction consists of (in sequence) general background, state of the art as the basis for the scientific novelty statement of the article, scientific novelty statement, and research problem or hypothesis. In the end, the introduction should mention the purpose of article review. Literature review is not allowed in the scientific article format, so it is replaced by the state of the art to prove the novelty of the article.

Research Methods

Methods are implemented to solve problems, including analytical methods. The method used to solve the research problems is described in this section. **(For Conceptual Ideas Without a Research Methods).**

Results and Discussion

This section consists of results and discussion. Every result should be supported by sufficient data. Then, the result should be able to answer the research question or hypothesis stated earlier in the introduction.

Conclusion

Conclusion states the answer of the hypothesis and/or research objective or scientific finding. Conclusion is not the repetition of findings and discussion, but it is the summary of findings as expected in the objective or hypothesis. If necessary, conclusion can also be ended with the next idea to be implemented to the study.

Acknowledgements

Acknowledgements are primarily addressed to research funders or donors. Acknowledgement can also be dedicated to people who contribute to the study.
