

Google Analytics

If you want to gather analytics on how your users are using your Wiki, for example to see what articles are popular, you can set up Google Analytics for your Kbee Wiki in a few steps.

Note: Kbee only supports the latest Google Analytics 4. Your Measurement ID will start with “G-”
Please do not use older versions of Google Analytics.

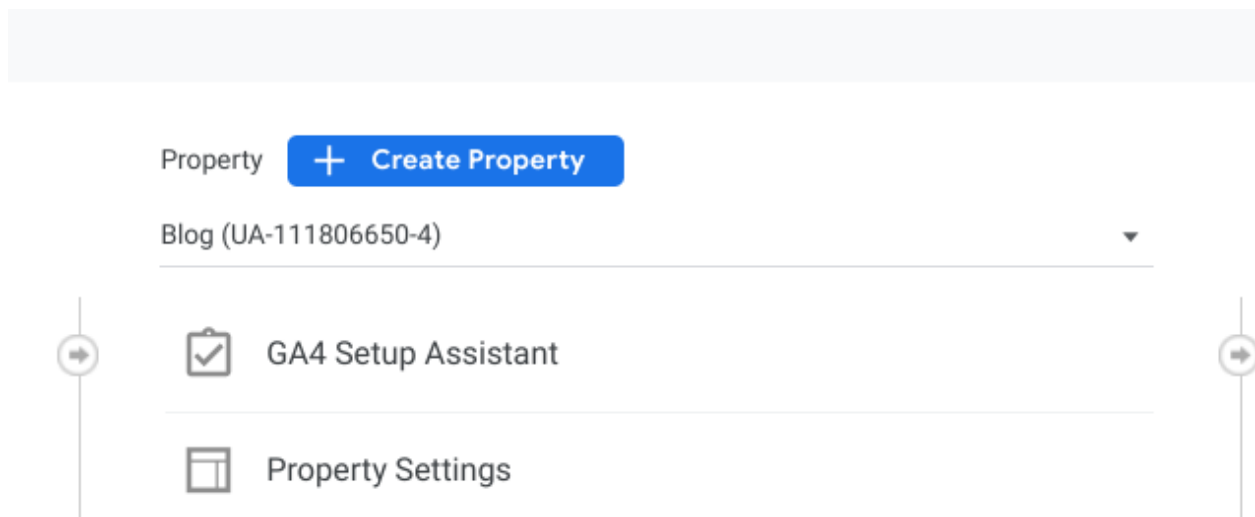

Google Analytics Setup

Follow the official guide from Google to set up a new “Web Stream”

<https://support.google.com/analytics/answer/9304153#zippy=%2Cweb>

For Kbee, make sure you do the following:

- 1) Create a new property

- 2) Choose at least the first option

How do you intend to use Google Analytics with your business? (Check all that apply)

- ☒ Measure customer engagement with my site or app
- ☐ Optimize my site or app experience
- ☐ Measure data across multiple devices or platforms
- ☐ Optimize my advertising cost
- ☐ Increase my conversions
- ☐ Measure content monetization

3) Select Web

Choose a platform

 Web

4) Put in the URL for your wiki

Website URL	Stream name
https:// <yourwiki>.kbee.app Valid website URL is required.	My Wiki

5) Copy your Measurement ID. Make sure it starts with “G-”

MEASUREMENT ID

G-DGKLY687F0 

6) Paste it into the field in your Kbee Settings

Embedded Origins

☒ Hide Logo on Embedded Pages

☐ Require Page to be Embedded

<https://ybwgm.csb.app>

Add Origin

Save

Google Analytics

Google Analytics Measurement ID
