

Starlight

nSt or StSt

- Starlight is a soft, flowing white marking with little spots meant to look like stars.

Range: Min to Max

At the most minimum, it only needs to be a single swath and some stars. Since it is done with a soft brush, it does not have to look pure white.

At the most maximum, the starlight areas are typically pure white and more solid looking, with the stars less visible.

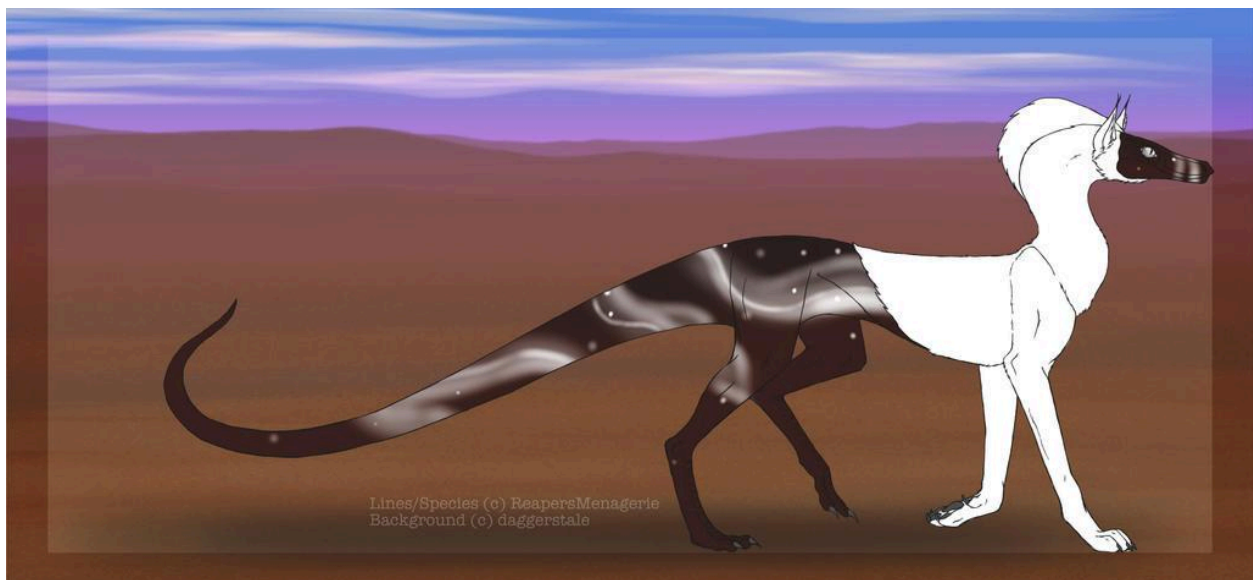

General Example with Wings:

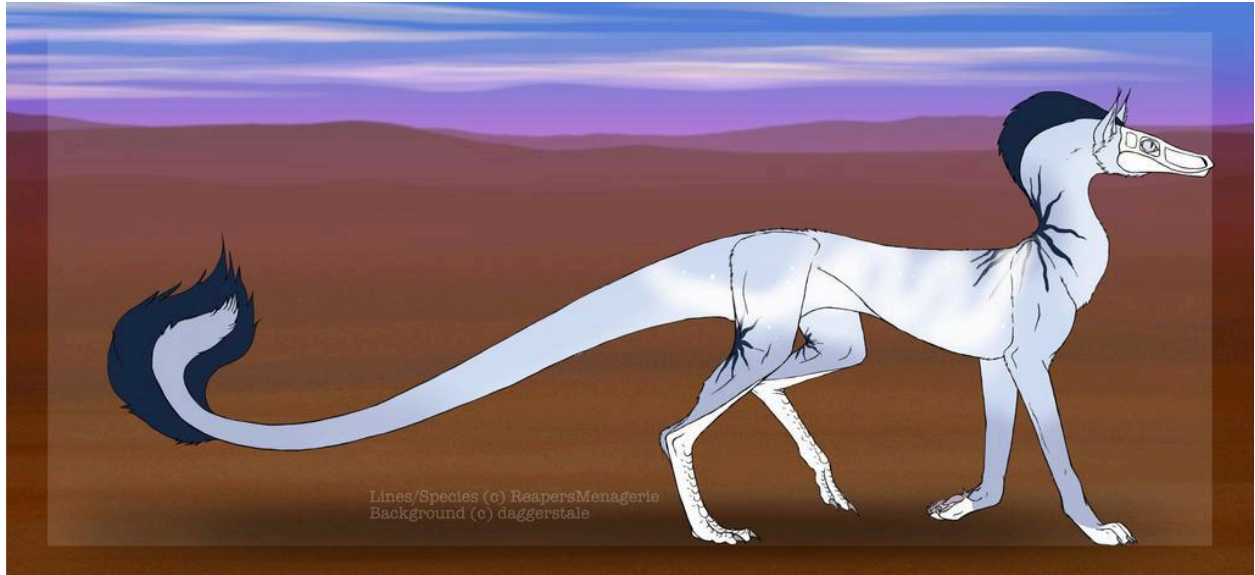

GROUP EXAMPLES:

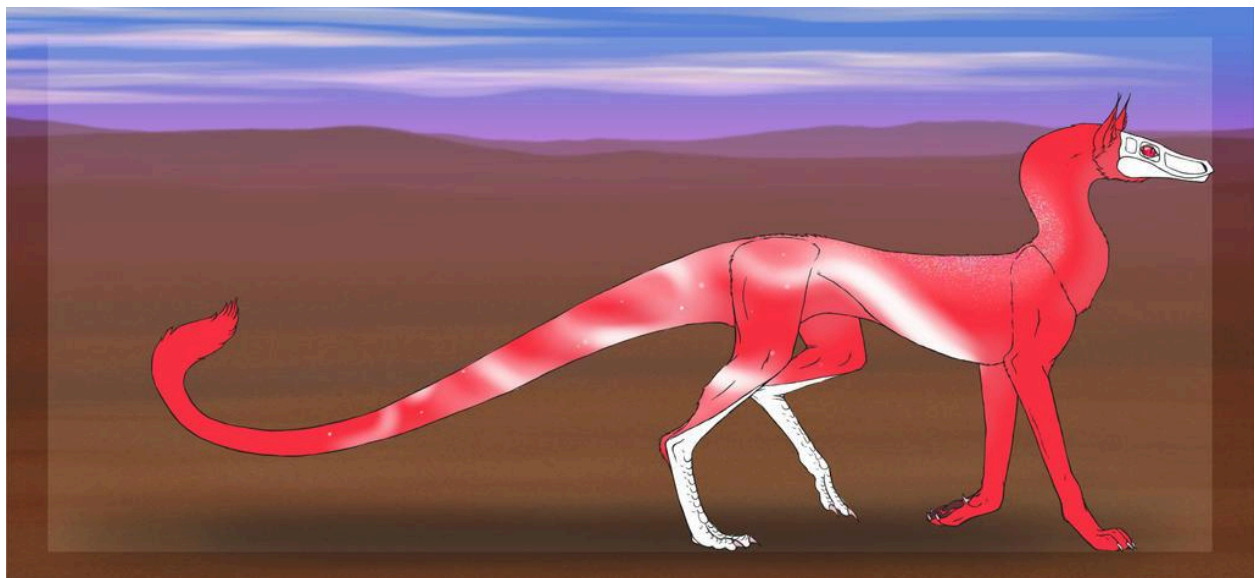

Yellow Starlight

Dom white over Sooty Orange under startlight

Blue Dun Double Cream Spiderlimb Starlight Splash white

Salmon with Sparkle and Starlight
