

Calculator Rentals

Does your math class require a graphing calculator? Chemeketa's Yamhill Campus rents out the types of calculators used in our math classes.

Do I need to rent a calculator for my class?

There are many online calculator options that might be suitable for your class. You can try out these options.

- [Desmos Scientific Calculator](#)
- [Desmos Graphing Calculator](#)
- [TI SmartView Software](#) (free for 90 days)
- [WabbitEmu Graphing Calculator Emulator](#)

If you want or need a handheld calculator rather than an online option, renting one from the Yamhill Campus is one way to get one. If you aren't sure what calculator will work best for your class, ask your instructor.

How does renting a calculator work?

Calculator rentals last for one term. To rent a calculator, please come to the YVC Library & Tutoring Center (hours: library.chemeketa.edu). When you arrive, you will be asked to fill out a Rental Agreement. Please bring a student ID check out your item. If you need an ID, please stop at the Student Services Desk on the first floor.

How much does it cost and how do I pay to rent a calculator?

A \$30 charge will be put on your student account. At the end of the term, if the calculator is returned on time and undamaged, a \$22 refund will be put back on your student account.

If you do not return the calculator at the end of the term, your student account will additionally be charged for the replacement cost of the calculator.
