

Presents:

# How to Live Like an Ecovillager: Low Carbon, High Quality

## How to Create a Successful Co-op: Sharing Table, Tools, & Transpo Webinar #4 Resource List

Your local extension office or state university agricultural program department will have many resources and guides developed for the public. Your state Department of State will have online guides and forms for setting up your own separate legal entity for your co-op or other endeavor. You can also ask your local Bar Association or CPA society for a referral to attorneys and accountants to specialize in these types of businesses.

Visit local CSAs and Co-ops, and ask them how they work....most are happy to spread the word and share their experiences and advice. Don't be afraid to start small with one or two others, and learn as you go!
