Overview

Find the best placement for your scholar!

This individualized 1:1 math placement session offers a clear, professional evaluation of your scholar's skills—one full grade level at a time. Using Nearpod's interactive platform, scholars complete a carefully designed sequence of standards-aligned math tasks while the educator observes and records responses.

Each session covers math standards for a full grade level, providing a thorough and accurate picture of mathematical understanding. This is a true **assessment—not tutoring**—ideal for placement, curriculum planning, or identifying specific learning gaps.

What's Included

- A 60-minute Nearpod session assessing one full grade level
 - Standards-based questions covering fluency, reasoning, and application
 - A comprehensive written report emailed within 48 hours of the session
 - A detailed grade-level standards checklist showing:
 1. Skills with proficiency
 2. Skills needing review/instruction
 3. Suggested placement or next steps
-

Perfect For

- Homeschool families planning curriculum
 - Scholars transitioning between schools or grade levels
 - Parents wanting clarity before advancing or remediating math instruction
-

How It Works

Before the session, families complete a short intake form to share background and goals. During the live session, your scholar completes math tasks through Nearpod while the educator observes. Limited feedback is given during the session to keep the assessment objective. Within 48 hours, you'll receive a detailed written report and checklist to guide your next steps.

Optional: Schedule additional sessions to assess multiple grade levels if desired.

Disclaimer

While these assessments use professional tools and methodology, we cannot guarantee full alignment with all programs or teachers' recommendations. Final placement decisions rest with families and their chosen program.
