

Microphone Issues in Google Meet

1. Check that your microphone is connected.
2. Restart your device.
3. Check that your microphone is allowed:

Note: While in a Meet, the menu with the mic icon collapses to the bottom of the screen, hover your mouse over the bottom of the screen to activate the menu bar.

4. Google Support:

Unmute your Windows device

1. Open the **Sound settings** > click **Recording**.
2. Double-click the microphone.
3. Select **Levels**.
4. Check that the microphone is on.
5. To raise the volume, move the volume slider and click **OK**.

Unmute your Mac device

1. Go to **System Preferences** > click **Sound** > **Input**.
2. Make sure that the microphone is on.
3. Raise the volume with the volume slider.

The volume setting will save automatically.
