

| Unit Number and Name   | Unit 1 Expressions, Equations and Inequalities   |               |   |
|--|--|---------------|---|
| Unit Question  | How can we manipulate information to help us solve real-world problems?  |               |   |
| Essential Questions:   | <ol style="list-style-type: none"> <li>1. How can we represent information symbolically?</li> <li>2. How do we develop mathematical arguments/proofs for solving real-world situations?</li> <li>3. How can we use related, but different representations to solve real-world problems?</li> </ol> |               |   |
| Initial Task--1 day  | Students will engage in various problem solving strategies in this <a href="#">Mystery Letters Task</a> .  |               |   |
| Big Ideas  | Objectives Reached   | EQs Addressed | Evidence of Understandings  |
| Big Idea 1: Polynomial expressions can be simplified and evaluated | A1.A.3.2<br>A1.A.3.4   | EQ1<br>EQ3    | <p><b>Generate equivalent expressions using operations on whole numbers and exponents</b></p> <ul style="list-style-type: none"> <li>○ Add and subtract like terms within a polynomial expression <ul style="list-style-type: none"> <li>■ Determine when an expression is completely simplified</li> </ul> </li> <li>○ Multiply terms in a polynomial expression and use proper exponent rules <ul style="list-style-type: none"> <li>■ Understand what happens to the power of a variable when multiplied</li> </ul> </li> </ul> <p>● Justify reasoning</p> |

|   |                 |            |  |
|---|-----------------|------------|--|
|   |                 |            | <p><b>Evaluate a polynomial expression</b></p> <ul style="list-style-type: none"> <li>○ Evaluate a variety of algebraic expressions including absolute value, radicals (square or cube roots), or rationals for given values of the variables.</li> <li>○ Understand how to reason and work with a non-standard operation.<br/>Ex.<br/> <math display="block">3 \oplus (4 \oplus 4) \text{ when } a \oplus b = \frac{ab}{(a+b)}</math> <math display="block">3 \oplus \left( \frac{4(4)}{(4+4)} \right)</math> <math display="block">3 \oplus \left( \frac{16}{8} \right)</math> <math display="block">3 \oplus 2</math> <math display="block">\frac{3(2)}{(3+2)}</math> <math display="block">\frac{6}{5}</math> </li> </ul> <p>* Justify reasoning</p> |
| <b>Big Idea 1 should take about 5 fifty minute class periods.</b> |                 |            | <a href="#"><u>Unit 1 Core Resource 1</u></a>  |
| Big Idea 2:<br>Polynomial expressions can be written as factors.  | <b>A1.A.3.3</b> | EQ1<br>EQ3 | <p><b>Factor out a GCF</b></p> <ul style="list-style-type: none"> <li>○ Identify when an expression has a common factor that can be factored out</li> <li>○ Determine the greatest common monomial factor</li> <li>○ Divide out that factor</li> </ul> <p><b>Factor a quadratic expression</b></p> <ul style="list-style-type: none"> <li>○ Use knowledge of multiplication of polynomial expressions to factor a quadratic equation into two binomials if possible</li> <li>○ Understand how the signs of the binomials affect the quadratic</li> </ul>   |

|  |  |  |  |
|--|--|--|--|
|  |  |  | expression   |
| Big Idea 2 should take about 4 fifty minute class periods.   |  |  | <a href="#">Unit 1 Core Resource 2</a>   |
| Formative Assessment   |  | After big ideas 1 and 2, the formative assessment should take about one fifty minute class period. | <a href="#">Unit 1 Formative Assessment 1</a>  |
| Big Idea 3:<br>Square and cube roots can be added, subtracted, multiplied, divided, and simplified | <a href="#">A1.N.1.1</a><br><a href="#">A1.N.1.2</a> | EQ1<br>EQ3   | <p><b>Simplify square roots and cube roots</b></p> <ul style="list-style-type: none"> <li>○ Use knowledge of factors to produce simplest form of roots</li> <li>○ Apply absolute value bars when taking the square root of a variable that results in an odd exponent</li> </ul> <p><b>Perform arithmetic operations on square roots</b></p> <ul style="list-style-type: none"> <li>○ Add and subtract square roots <ul style="list-style-type: none"> <li>■ Combine like radicals by adding or subtracting the coefficients</li> <li>■ Understand that radical will not change when adding or subtracting</li> </ul> </li> <li>○ Multiply a square root <ul style="list-style-type: none"> <li>■ Multiplying will change the radicand and might need to be simplified further</li> </ul> </li> <li>○ Divide square roots <ul style="list-style-type: none"> <li>■ Simplifying square roots may make it easier to rationalize</li> <li>■ Radicals may not be left in the denominator and must be rationalized</li> </ul> </li> </ul> |
| Big Idea should take about four fifty minute class periods.  |  |  | <a href="#">Unit 1 Core Resource 3</a>   |

|  |  |                            |  |
|--|--|----------------------------|--|
| <p>4. Equations and inequalities can be solved in both algebraic and real-world contexts</p> | <p>A1.A.1.1<br/>A1.A.1.2<br/>A1.A.3.1<br/>A1.A.2.2</p> | <p>EQ1<br/>EQ2<br/>EQ3</p> | <p><b>Solve equations and inequalities in real-world problems</b></p> <ul style="list-style-type: none"> <li>○ Use knowledge of solving equations to solve real world problems such as angle measure, geometric formulas, or science and statistics problems.</li> <li>○ Use formulas or other necessary equations to solve problems</li> <li>○ Interpret solutions in original context to check for reasonableness</li> </ul> <p><b>Solve equations with several variables in terms of one specific variable</b></p> <ul style="list-style-type: none"> <li>○ Apply algebraic properties of equality in order to create equivalent equations in order to isolate the appropriate variable.</li> </ul> <p><b>Solve absolute value equations</b></p> <ul style="list-style-type: none"> <li>○ Know that absolute value is a distance from zero and results in two solutions, one in each direction (positive and negative)</li> <li>○ Isolate absolute value before solving equation</li> <li>○ Recognize <math> x-a  = b</math> is <math>b</math> units away from <math>a</math> since <math> x  = b</math> is <math>b</math> units away from zero</li> <li>○ Solve absolute value equations and interpret the solutions in the original context</li> </ul> <p><b>Solve and graph compound and absolute value inequalities</b></p> |
|--|--|----------------------------|--|

|   |  |  |   |
|---|--|--|---|
|   |  |  | <ul style="list-style-type: none"> <li>○ Compound inequalities can have separate ,or disjoint, solutions or overlapping, conjunction, solutions</li> <li>○ Make connections between algebraic and graphical solutions</li> <li>○ Graph solutions to inequalities on a number line.</li> <li>○ Identify two separate inequalities of absolute value and determine outcome of their graphs</li> <li>○ Write and graph compound inequalities given a real world situation</li> <li>○ Use correct vocabulary of compound inequalities and determine number of solutions <ul style="list-style-type: none"> <li>■ Know the difference between disjunction and conjunction solutions</li> </ul> </li> </ul> |
| <b>Big Idea 4 should take about six fifty minute class periods.</b> |  |  | <a href="#">Unit 1 Core Resource 4</a>  |
| Formative Assessment  | After big ideas 3 and 4, the formative assessment should take about one fifty minute class period. |  | <a href="#">Unit 1 Formative Assessment 2</a>   |
| Reengagement  | Take a day or two to revisit concepts students struggled with in the formative assessments.        |  |   |
| Summative Assessment  |  |  | <a href="#">Unit 1 Assessment</a>   |

Essential Terms--

Expression

Term

Coefficient

Polynomial

Monomial

Binomial

Factor

Simplify

Quadratic

Square root

Cube root

Equation

Inequality

Absolute value

equality
