

# Chromebook Cleaning

1. Only use the school recommended solution to clean the Chromebook (School solution is 50% water and 50% white vinegar). NO OTHER CLEANING PRODUCTS
2. Make sure your Chromebook is disconnected from power and is shut down before cleaning.
3. Spray the solution to the soft microfiber cloth (do not spray solution directly on Chromebook or use paper towels).
4. Wipe the cloth against the screen of the Chromebook in a circular and consistent motion.
5. Apply even pressure, but not too much pressure as you can damage the screen.
6. Repeat the same steps for the keyboard and the outside case.

\*Dirty cloths should be exchanged for clean cloths in the library.\*
