

What's a HyperDoc? →

There are loads of links in this tour, they will lead you through, can you find them all?
Try clicking arrows or squirrels (for distractions)

A **HyperDoc** is a Google Document that replaces the worksheet method of delivering instruction, adding innovation and inquiry based learning methods.

- It's full of instructions, links, graphic organizers, and any other tools needed for a student to complete a task.
- It can be used in class, with a balanced flow between teacher directed instruction/discussion, or as flipped work.
- It is collaborative- easy to use for individuals, partners, or group work.
