A Must Have For Every Backpacker, Bug Out Bag & 72 Hour Emergency Kit!

If you can't make fire in a survival situation, you're dead meat. People think that important survival tools are things like water purifiers, knives, or maybe even guns, but they're totally wrong. Fire is the most important survival tool, bar none, and here's why:

Fire can be used to boil lifesaving water without having to carry anything but a metal pot to boil it in. No filters, no gimmicks, just purifying heat.
Fire keeps you from freezing to death.
Did you know you could die of hypothermia in temperatures above freezing?
Fire hardens wood into almost iron like proportions. Think spear tips!
Fire's great for cauterizing wounds!

Simple put, fire is MUST HAVE!

Black Beard Fire Plugs are an easy and convenient, must have fire tinder for every outdoor activity, home, vehicle, bug out bag and 72 Hour/Emergency Kit.

Black Beard Fire Plugs are for those who are interested in a lightweight, ultra compact fire starter but refuse to compromise on quality.

Light a fire in any condition, Guaranteed!

“Literally saved our lives
We just got back from a 50 mile backpacking trip in the high uinta mountains. We packed for emergency situations thinking we would never need any survival gear. Top of the line tent, below zero down bags, satellite phone. we thought we were ready for anything. We were hit with 4 inches of rain, sleet, snow, and hail on our 4 day trip.”
-**Kyligirl**

“Outstanding!
This stuff is awesome! You can use it over and over, a little goes a long way! Can’t wait to use it on a camping trip!”
- **Bob C**

“performed as shown
i tested this in water and it did as shown in some advertisments and stayed lite while floating on the water and for the small amount i used it burnt for a good time also it arrived 3 days before it was ecspected”
-**burnus hamilton**

The reviews speak for themselves.

You, too, can light a fire in any condition with Black Beard Fire Plugs!
