

Math Autobiography

Name: _____ Period: ____ Due: _____

Write your math autobiography. This should be a thoughtfully written letter to Mrs. Hobbs, so that she can get to know you better. The letter will be 1-2 pages long in paragraph form. **Pick one option** below.

Option A: Be sure to include the answers to the following.

- ✓ What is your earliest memory about math?
- ✓ What do you like best about math?
- ✓ What do you like least about math?
- ✓ How do you learn math best?
- ✓ Describe some of your best experiences in math classes.
- ✓ What value do you think math has for you outside of school?
- ✓ What are your strengths as a mathematics student?
- ✓ What are your weaknesses as a mathematics student?
- ✓ What areas of mathematics are most interesting for you?
- ✓ Describe three goals you have for this class. We will discuss these during the year.

Option B: Your letter will have three parts.

1. **You:** Introduce yourself, using the name you like to be called. What are your hobbies? Talents? Interests? Goals? Dreams? What do you like to do in your spare time? What are you proud of? What else would you like to share?

2. **You as a student**: How important is school to you? What are your study habits? What school activities do you do best at? What activities do you get frustrated with? What subjects are your favorite and why? How often do you finish your homework?

3. **You as a math student**: What is your best memory in math? Why do you remember it? What is your favorite math topic? What is your least favorite topic? How well did you do in math last year? Who was your teacher? How do you feel about math this year? What grade do you want to get?
