Prompter

Prompter is my gift to the MidJourney AI creative community. It is a Google spreadsheet and cloud database to assist and ease prompt design, as well as a detailed Visual Notebook. The interface is simple and straightforward for new users, but also thorough and comprehensive enough for the advanced crowd.

Prompter offers an easy to understand design, and contains a cloud database of descriptors, artists, movies, lighting, and so much more. Get everything you need in a clean user interface without even scrolling, and never type :: or -- ever again.

Prompter (the spreadsheet and this notebook) is a passion project for me, and I plan to keep things updated and growing as MidJourney itself evolves. It takes a lot of time and work, so I give a big thank you to all of the support of large and small donations. It is because of you that I am able to stay on the platform and bring you more tools and content. If you have any feedback please reach out to me... Click [HERE](#) to get the latest version of Prompter for free!

The screenshot shows the Prompter interface with the following settings:

- Main Idea:** under the ocean, coral, seagrass (Weight: 5)
- Subjects:** crystals (Weight: 3), reflected light (Weight: 2)
- Do Not Include:** horizon, sky
- Image URLs:** (you can send a photo to the Bot in Discord then click "Open Original" and copy that URL)
- Style:** 3000 (2022 is v6 2500 default, 800000000)
- Quality:** 2 (0.25 quick, 1 default, 2 high, GPU used)
- Same Seed:** (all images in same style)
- Stop:** (stop render progress at 10-100)
- Version:** Version 1 (first version, for features / tested), Version 2 (use the old algorithm, 3 is default)
- HD:** (large images / abstract)
- Uplight:** (results closer to original, softer)
- Video:** (sends a DM of a video, only for 4-up)

Aspect Ratio: 1000px -- Wide, short (use W:H like 3:2)

Medium: photograph (comes before main prompt)

Camera: wide angle lens (multi-select)

Lighting: light rays (multi-select)

Color: vibrant color (multi-select)

Descriptor 1: magic realism (multi-select)

Descriptor 2: high definition (multi-select)

Descriptor 3: CUSTOM (enter be --) (multi-select)

Artist: Maggie Taylor (multi-select)

Video: (multi-select)

Depth Of Field: Shallow (focal blur)

Text: (changed to write words, but if might not work)

Weight: 10

Prompter Output: imagine prompt: photograph of under the ocean, coral, seagrass:5 by Maggie Taylor - crystals:3 reflected light:2 dof magic realism high definition dreamy wide angle lens light rays vibrant color --no horizon, sky --style 3000 --quality 2 --ar 1000

Visual Notebook

The Prompter Visual Notebook is a new work in progress, but already quite organized and extensive enough that I hope you find it to be a great creative resource. This is not an official guide, and I am not affiliated with MidJourney in any way, just love their AI, however you can check out their user guide [HERE](#) as well. This is a collection of visual examples from the Prompter database. All of my tests use the same simple prompt "a city street" because I assume the AI was likely trained on a lot of street images, and also a scene like that is very flexible with descriptors. Of course, some artists or terms might display better results with a portrait or something, but hey, you can't have it all! I used a 16:9 aspect ratio as a standard (but be aware

that compositions can change drastically with different ratios), and used the same seed for consistency. These tests were all done on the latest version 3 of MidJourney.

The Visual Notebook is split up into sections based on the organization in Prompter. Below are bookmarks to each of the sections. As this is a work in progress, feel free to [CONTACT](#) me if you have any ideas, see issues, or if I made some stupid mistake (as I tend to do!).
