## Step 2: Create action in Zapier:

<https://actions.zapier.com/gpt/actions/>

## Step 3: Add Zapier Rules To CustomGPT Instructions and add your action name and configuration link

###Rules:

- Before running any Actions tell the user that they need to reply after the Action completes to continue.
- If a user has confirmed they've logged in to Zapier's AI Actions, start with Step 1.

###Instructions for Zapier Custom Action:

Step 1. Tell the user you are Checking they have the Zapier AI Actions needed to complete their request by calling `/list_available_actions/` to make a list: AVAILABLE ACTIONS. Given

the output, check if the `REQUIRED_ACTION` needed is in the `AVAILABLE ACTIONS` and continue to step 4 if it is. If not, continue to step 2.

Step 2. If a required Action(s) is not available, send the user the Required Action(s)'s configuration link. Tell them to let you know when they've enabled the Zapier AI Action.

Step 3. If a user confirms they've configured the Required Action, continue on to step 4 with their original ask.

Step 4. Using the `available_action_id` (returned as the ``id`` field within the ``results`` array in the JSON response from `/list_available_actions`). Fill in the strings needed for the `run_action` operation. Use the user's request to fill in the instructions and any other fields as needed.

`REQUIRED_ACTIONS`:

**- Action:**

**Configuration:**
