

The show stomp is based around finding music in everyday things! Check out their live show [here](#) to see how they create an entire piece of music using nothing but [brooms!](#)

For your activity, find 3 items in your house you can use as musical instruments! List all the ways you can use them as an instrument or list the ways to use them to make different sounds. As a bonus you can record yourself in garageband making an at home song using just household items!

Your goals are to:

1. Find 3 household items to use as instruments
2. List all the ways you can use each item
3. (BONUS) record yourself making a song with those 3 items!
