Luck : 3

Skills:

- Energy Weapons
- Stealth
- Medicine
- Science

Perks:

- Night Person

- Nerd Rage
- Nuclear Physicist

Laser rifled (Modified Scope and automatic)

Backstory

Born in 2269 to the community of The Shi, the then Lilly Wong lived a peaceful life as a student studying science.

In 2277, a Chapter of the West Coast Brotherhood of Steel had a battle against The Shai, which led to a Brotherhood of Steel victory. The result for Lilly was to be spared her life once Paladin Rudu found her and became empathetic to a now orphaned child which he caused. He adopted her, took her into the brothers Brotherhood of Steel as a squire.

2287 was the victory of The Brotherhood of Steel in the Commonwealth. The institute was defeated, the Prydwen flew high, and the Brotherhood of Steel claimed technological superiority. A victory that united chapters and branches of the BoS across the wasteland of America.

This was the year in which Lily grew to be 18 years old and graduated as Squire to Scribe to a knight. It would be the first she flew on a Vertibird to do countless missions from the West Coast to the East Coast before making the Prydwen her home.

In 2293, Her adoptive Father, Paladin Rudu would fall in Battle during a failed attack on a Supermutant Behemoth that was causing them trouble.

In 2295, Lily would become a Knight of the Brother of Steel. Her task as Knight is researching FEV underground Paladin Edwards across the wasteland. While set to destroy it, she wishes to learn more about it.

Views and Politics

Lily was raised into the Brotherhood of Steel, and has grown to adopt their beliefs and views. She strongly believes in the dangers of technology such as AI and weapons with the average wastelander. She strongly believes that it is humanity's downfall, especially when it comes to Radiation and FEV.

After her adoptive father's death, she grew a stronger hatred for mutants in the wasteland. Once a standard phobia became a strong hatred for all that has twisted and turned thanks to FEV and Radiation.

Ghouls do not share the same hatred, she is phobic of them and doesn't trust them but she remembered ghouls in The Shai. She is willing to protect and fight along them, but she doesn't trust them. She almost pitys a victim of humanity.

She has no hatred for AI. They were friendly in The Shai, but seen as destructive in The Brotherhood of Steel. She wasn't there to fight against the institute. AI is a Taboo for her, as a lesbian, it became an attraction for her when she first encountered Ms Nannies.

Random Facts:

- If tested in modern times, Lily would have an autism diagnosis..
- Their favourite food is Mirelurk Omelettes.
- They Hate the taste of Nukacola Quantum
- Lily dislikes Chems because of their addictive nature.
- Being of Chinese Descendant, they face bigotry from the Knights and Scribes. This isn't shared by higher Paladins or Elders, as they only see her work.
- She has two scars, one across her eye lid from a racist attack against her. The other is the Knight Markings of Rudu on her back after becoming a Knight.
- She has a crush on the Nukagirl posters.
