

If I am feeling something isn't quite right
Take me by the hand
If I forget to say „I love you“ each night
You understand

If I am happy it's because you are mine
With so much love to give
You hold the key to my heart
I know that we'll never part
Long as we live

We're gonna stay together
Noone will ever tear us apart
You have the only key to my heart
My dreams come true
We're gonna stay together
No matter what the others may do
'Cause I love you
And I love you

I only have to feel the touch of your kiss
I look into your eyes
To know that there is nothing better than this
I realize
Komm küss mich sanft und schon heute sind wir
Ein verliebtes Paar
Ich bleib für immer bei dir, denn deine Liebe zu mir
Ist wunderbar
We're gonna stay together
Noone will ever tear us apart
You have the only key to my heart
My dreams come true
We're gonna stay together
No matter what the others may do
'Cause I love you
And I love you

My life is nothing without you
How many times must I say

We're gonna stay together
Noone will ever tear us apart
You have the only key to my heart
My dreams come true
We're gonna stay together
No matter what the others may do
'Cause I love you
And I love you
