

This chart identifies some of the options for unit and lesson print and digital instruction.

Although the Digital Student Edition and the print Student Activity Guide are not a one-to-one match, they cover the same content and standards and share the same unit, lesson, and 5E structure.

- **Core Path** The Core path is the recommended path to cover all of the Next Generation Science Standards. At Grade 3, the recommended Core path is based on 30-minute instructional segments occurring 3 times per week for approximately 30 weeks.
- **Extended Path** If you have additional time, the Extended path provides additional opportunities to explore and reinforce the science content.
- **Short-on-Time Path** If you have less time than the Core path assumes, the Short-on-Time path highlights key pieces to focus on. The Short-on-Time path covers many, but not all, of the standards.
- **Blended Path** If you need more time for science, we recommend using the Blended path. In the Blended path, you use available science instruction time plus 30 minutes of English Language Arts instruction time to explore the FUNomenal Readers in order to cover all of the standards.
- **Customized Path** While we have provided pacing estimates, you may find some things can go faster or slower in your classroom. You can make your own pacing notes in the “customize your pacing” column.

 = print resource  = digital resource	Short on Time	Core	Extended	Blended	Customize Your Own Path
Unit 1 Engineering and Technology	225 min (7.5, $\frac{1}{2}$ hour segments)	315 min (10.5, $\frac{1}{2}$ hour segments)	630 min (21, $\frac{1}{2}$ hour segments)	255 min (8.5, $\frac{1}{2}$ hour segments)	
Unit Project 			90 min 3, $\frac{1}{2}$ hour segments		
You Solve It 			30 min		
Unit Performance Task 			45 min		

			1.5, $\frac{1}{2}$ hour segments
