**Title: Times New Roman; Size-14; Line Spacing: Single**

### **ABSTRACT**

Initiate with a brief introduction. State the objective in specific and clearly, as to what is to be obtained. Give a brief account of the methods. Identity scientific names of plants, another organism, and chemicals. State results succinctly. State conclusions or recommendations and link this to the significance of the work. The abstract must be integrated and independent which is consist of introduction and purpose, methods, results, conclusion, and suggestion. The abstract must be written using 150 until 250 words which have no reference and accompanied keywords. It should be written using Times New Roman 11.

**Keywords:** Keywords should not more than 5, avoid the words in the title. The keyword must represent the content of your article. It should be written using Times New Roman 11 (alphabetically order)

### **INTRODUCTION**

Present brief and clear information concerning the background, aim, and purpose of the research. Provide the background information regarding with your study and why you interesting in the study. The introduction must present the detail of the research problem. Please make sure that the introduction section provides well balance, current and relevant citations. Please justify the research problem with sufficient and relevant citations. Avoid/ minimize citing old references (more than 15 years old), but cite the first finding relates to your research although it is more than 15 years old. The introduction should end with presenting the gap of current related knowledge, then the purpose of your research to answer your research question. The introduction must be written using Times New Roman 11.

### **MATERIAL AND METHODS**

It should mention time and place of research in first part. All materials and methods that used such chemical for analysis, treatment, and experimental design must be stated clearly and briefly. Write what you did in the past tense. If you did a new method, describe very clearly step by step so another researcher can reproduce your method. But if you employed an established method, explain briefly and clearly write the reference you cited so another researcher can find out the more detail information regarding with the method. All the parameters and statistical methods must be written apparently. Materials and methods must be written using using Times New Roman 11.

## RESULTS AND DISCUSSION

Result and discussion must be written in the same part. They should be presented continuously start from the main result to the supporting results and equipped with a discussion. This section must show the acuity of the analysis and synthesis carried out critically including a description of the findings of the work that discusses incisive, its relation to previous concepts or theories, compares them critically with the work of others, and corroborates or corrects to the previous findings. Unit of measurement used should follow the prevailing international system. All figures and tables should be active and editable by an editor. The discussion should explore the significance of the results of the work. Please highlight differences between your results or findings and the previous publications by other researchers.

## CONCLUSION

Clearly answer your research objective in Conclusion. Write your conclusion clearly so the reviewers and the readers can easily judge the merits of your work. Do not include the statistical statement in this section. You can also suggest the future experiment based on your conclusion. The conclusion must be written using 40 until 80 words and it should be written using Times New Roman 11.

### Figures and Tables

Figure and table should be placed separately from the text. The figure should be drawn in white and black color and figure's remarks placed in the bottom with before 4pt. The title of figure placed after the remarks with single space.

Figure 1. Illustration of figure's width same as column width

**Table 1.** Text textRemarks :**Table 2.** Text textRemarks :

State the grant source and the person to whom the grant was given. Name the person(s) who helped your study. The acknowledgment must be written using 20 until 3000 words with Times New Roman 11.

## REFERENCES

*All reference mentioned should be written down in reference using American Psychological Association (APA) 6<sup>th</sup> style and arranged from A to Z. Use the recent 10 years references, the references older than 15 years are not accepted. Authors are welcome to use EndNote, Mendeley, Zotero, or any other reference manager that allows for export of formatted references to Microsoft Word or other word processing program. Link the citation references to its record on CrossRef to minimize incorrect typing. Avoid using citation references which are not registered in CrossRef.*
