Senior Full-Stack JS Engineer

We're seeking a talented **Senior Full-Stack JS Engineer** to join our innovative team. In this role, you will cooperate with product managers and engineers to shape solutions from inception to deployment.

About the Customer:
The company is one of the world's leading business news organizations, recognised internationally for its authority, integrity, and accuracy. The customer has a record-paying readership of one million, three-quarters of which are digital subscriptions.

Project Team:
When you join our team, you'll be immersed in a culture where teammates always help each other achieve better results. We believe that together we are better and that we can always create brilliant solutions through high levels of collaboration.

Tech Stack:

- Java (Spring Boot, Dropwizard)
- Kubernetes (EKS)
- AWS
- Node.js
- GraphQL
- Jenkins/CircleCI
- DynamoDB
- Kafka
- RDS (Aurora)
- Web Application Frameworks (Angular/React/Express)

Requirements:

- 4+ years of experience as a developer in a fast-paced environment
- Expertise in JavaScript (React)
- Proficiency in JavaScript (Node.js)
- Familiarity with AWS, Kafka, DynamoDB, GraphQL
- Positive attitude and passion for solving challenges in an ever-changing environment

English level:
Intermediate+

Position Responsibilities:

- Work with an Agile delivery approach, in a team of engineers
- Design and implement low-maintenance, well-monitored, secure and scalable solutions, from cradle to grave
- Play an active part in designing the architecture, tooling, and release cycle processes
- Contribute to company-wide processes, frameworks, and guidelines
- Develop a close relationship with our customers and provide operational support
