

Subject: Will you make the switch to renewable energy?

To the manager of <organisation>,

I'm a customer of yours and I'm getting in touch to ask whether your organisation is powered by 100% renewable energy? As a consumer, I'm incredibly concerned about the impacts that fossil fuel consumption has had on our climate as the biggest source of emissions is burning coal for electricity.

Recently I learned that only 15% of Australia's electricity is generated from renewable energy sources and I would love for you to make the switch to renewable if you haven't already. I don't feel comfortable continuing to support businesses that aren't ready to make the switch to 100% renewable energy. This is an urgent call from all Australians as it will directly impact the future of our country.

Moving away from fossil fuels is easy, and **switching to 100% renewable energy is tax-deductible for businesses, so it doesn't cost money to make the change today.**

You can find a suitable provider, and more information on the Australian Government Green Power website: <https://www.greenpower.gov.au/Business/Find-a-Provider/>

I look forward to hearing from you soon.

Thanks,
<name>
