#### SOFTWARE ENGINEER

Exceptional problem solver and communicator with a passion for patterns and logic. Made the career switch from linguistics to programming in late 2019. Now a Full Stack Web Developer with over a year of professional experience.

#### **TECHNICAL SKILLS**

HTML, CSS, JavaScript, React, Node / Express / MongoDB, SQL, Git / Github, Bootstrap / Tailwind, Ruby on Rails, Sinatra, Object Oriented Programming, Agile Methodology, Test Driven Development (TDD), TypeScript, PHP, MySQL

### **EXPERIENCE**

## **Treehouse Internet Group**

Seymour, CT

Frontend Web Developer

02/2020 - Present

- Develop interactive and dynamic web components using HTML / CSS and Vanilla JavaScript resulting in improved site performance and avoiding reliance on jQuery and other third party dependencies
- Collaborate with other departments to build out responsive, performant websites based on clients' needs
- Improved site speed by 20% using agile methodologies to implement performant CSS and JavaScript features
- Design, develop and deploy multiple Slack Bots using the Slack API, Node.js, cloud based database software and modern JavaScript (ES6) which are now used company wide to improve organization and performance
- Used PHP to create site templates, significantly reducing time taken to alter similar web pages across 100+ sites
- Boosted multiple sites' SEO rankings using Python web scraping to detect issues such as 404s and redirects

#### **TECHNICAL PROJECTS**

**Bug Tracker** - Github: <a href="https://github.com/HarryWilson1995/Bug-Tracker-MERN">https://github.com/HarryWilson1995/Bug-Tracker-MERN</a> | Demo: <a href="https://youtu.be/fh0B3c216Bw">https://youtu.be/fh0B3c216Bw</a> | Hosted: <a href="https://bug-tracker-pro.herokuapp.com/">https://youtu.be/fh0B3c216Bw</a> |

Designed to allow employees to keep track of bugs in their work projects

- Coded frontend using modern React, including React Hooks and the Context API
- Created a highly secure authentication system using JSON Web Tokens and Authentication Middleware
- Developed a full REST API for bugs with all protected endpoints using Node / Express / Mongoose / MongoDB Atlas
- Utilized test driven development on backend by consistently checking routes using Postman

**Sequence Lite** - Github: <a href="https://github.com/HarryWilson1995/JS-Card-Game-Sequence-SPA-">https://github.com/HarryWilson1995/JS-Card-Game-Sequence-SPA-</a> | Demo: <a href="https://sequence-lite.netlifv.app/">https://sequence-lite.netlifv.app/</a>

A single page multiplayer card game application in which players compete over one or multiple rounds

- Researched and implemented polymorphic relationships in Rails models so cards could belong to multiple models throughout the game, backend uses ActiveRecord and SQLite in development, PostgreSQL in production
- Designed the project using MVC architecture principles and used object oriented and ES6 JavaScript on the frontend
- Incorporated third party JavaScript library / plugins to add advanced features such as dragging sets of ordered cards
- Deployed frontend to Netlify and linked to Heroku backend in order to host high performing application

**LingoRater**- Github: <a href="https://github.com/HarryWilson1995/Review-App">https://github.com/HarryWilson1995/Review-App</a> | Demo: <a href="https://www.youtube.com/watch?v=OVSiBobBu4w">https://www.youtube.com/watch?v=OVSiBobBu4w</a> | Hosted: <a href="https://review-appz.herokuapp.com/">https://review-appz.herokuapp.com/</a>

Language Course Review App designed for users to write and read comprehensive language learning product reviews

- Used Ruby on Rails to create a full stack application with full CRUD functionality, nested routes and complex database relationships in order to provide a clean user experience
- Implemented full user authentication and added Facebook login option using OAuth Ruby gems
- Increased standard of reviews on the site by creating custom validations in the Rails models
- Added search bars to each index page to increase usability and speed of navigation within the app

### **EDUCATION**

Flatiron School
Full Stack Web Development, Ruby on Rails, JavaScript and React program

Terryville, Connecticut 12/2019 - 10/2020

Cambridge, England 09/2013 - 07/2017

University of Cambridge

Master of Arts (MA) and Bachelor of Arts (BA) in Foreign Languages & Linguistics
