

**QUIZIZZ** - *an online quiz game website that can be used for different instructional purposes and can be shared with students face-to-face or remotely.*

Accounts are free, you can create your own lessons and quizzes, and collections of quizzes, or you can access the Quizizz library of quizzes and lessons and save them to your library. Collections of quizzes can be shared with other people.

You can create classes of students and assign quizzes to be done in real time individually for practice, in groups, as a game/competition, or as homework for later. Quizizz can keep up with student progress and you can link it to your learning management system.

I have started a **group of quiz collections** with questions about each of the Disciplinary Core Ideas (DCIs) of the science standards. Some of these are short with as few as 4 questions and others are longer with 10-12 questions. Most are multiple choice, but a few open-ended questions are embedded. Some of the quizzes I created and others I have borrowed from the Quizizz library.

### ***How can these quiz collections be useful?***

- A quick check of student understanding within a lesson during class (formative assessment)
- Practice in understanding concepts by answering questions about them
- A digital homework assignment after a lesson on a topic
- Competitions among individual students or teams of students
