## **I. Background of the Study**

There are pupils who struggle with the subject science and needs help for improvement for their examination. This study aims to comprehend how 9th grade pupils perform in the science course. This seeks to ascertain whether pupils are struggling with the Science subject. The findings would help determine if students needs assistance with the subject.

## **II. Statement of the Problem**

This research will help the researcher, teachers, and school identify the performance of Grade 9 in science examination Quarter 1 and see if they will be needing help once they have a failing score in Disiplina Village-Bignay National High School S.Y 2025-2026

### **III. Significance of the Study**

The Grade 9 students will use this study to better understand how they performed on the Quarter 1 Science exam and pinpoint areas in which they still need to improve. Based on the outcomes of the pupils' examination scores, it will direct educators in refining their methods. The results could also be used by the school to develop initiatives that will improve pupils' academic achievement.

### **IV. Methodology**

#### **A. Research Design**

Documentary analyses were used in conducting the mini-research. According to Glenn A. Bowen (2009), documentary analysis is a systematic procedure for reviewing or evaluating documents as a source of data in research, as explained in his article Document Analysis as a Qualitative Research Method, available on ERIC (<https://eric.ed.gov/>).

## D. Statistical Treatment Mean

The sum of all values divided by the number of addends.

Percentile - A score percentile represents the percentage of scores that are equal or below a certain score within a given sample.

Percentile rank - Percentile ranks indicate how a student performed compared to others in a norm group.

$$\text{Mean} = \bar{x}$$

$$\bar{x} = \frac{\sum fx}{N} = \frac{14,039}{334} = 42.01$$

$$P_{50} = LB \left( \frac{\frac{kN}{100} - < cf}{f} \right) cw$$

$$\frac{kN}{100} = \frac{50(334)}{100} = \frac{16,700}{100} = 167$$

$$Pr_{38} = \left[ \frac{100}{N} \right] \left[ \frac{(Pr - LB)f}{cw} + < cf \right]$$

$$\left[ \frac{100}{334} \right] \left[ \frac{(38 - 36.5)53}{5} + 223 \right]$$

$$= (0.30) \left[ \frac{(1.5)53}{5} + 223 \right]$$

$$= (0.30)(238.9)$$

$$Pr = 71.67 \approx 72$$

## **V. Evaluation**

- The mean of 338 Grade 9 Students a 50 items Quarter 1 Science Exam is 42.01 % or 42 %
- 50 % of 334 Grade 9 Students got a score of which is equal to or less than 30.78 %
- 72 % of 334 Grade 9 Students got a score of which is equal or less than 38 %

## **VI. Conclusion & Recommendation**

Based on the result, it was affirmed that 334 Grade 9 Students who took a 50 item science examination has a 72% of students have a high scores as there are only a few students who got a failing grade and concludes that most has a passing grade.
