

# Music Analysis

LanternEQ Team

[www.lanterneq.com](http://www.lanterneq.com)

The EverQuest engine uses the XMI (extended MIDI) format for music playback. XMI stands for **Extended Multiple Instrument Digital Interface** and like MIDI, does not contain any sound but rather a sequence of instructions that software uses to synthesize audio. Due to improvements in technology and processing power, MIDI is rarely used anymore. More technical documentation about this format can be found here: <https://github.com/Mindwerks/wildmidi/wiki/XMI>

Each EverQuest zone can have a corresponding XMI file that matches its shortname. For instance, the zone Qeynos, which has the shortname 'qeynos', may have an associated qeynos.xmi file. The client will look for this when loading that zone into memory. One XMI file can contain multiple tracks. Even if a zone has a corresponding XMI file, there is no guarantee that any of the tracks are referenced. Some zones reference track indices that are greater than the number of tracks in the file which does not trigger any music in those areas. Some zones also have music triggers and no corresponding XMI file.

There are some special case XMI files. For example, files like gl.xmi, the global song bank, aren't referenced by any zone but are used directly by the client for music that is used in all zones (e.g. attack, underwater, merchant).

The files have been converted to MIDI by using code...

## Music Triggers

Music playback is started either by area triggers or action triggers.

**Area triggers:** Spherical triggers that exist physically in the world and have a 3D position and radius. When a player enters the trigger, the track associated with that trigger begins to play. If another track is playing, it will fade out quickly before the new track begins. When a player leaves an area trigger, the music starts to fade and this duration is specified for each music trigger. In some zones, area triggers may have a very large fade time ( > 40 seconds). Triggers can have a specified day and night track. If a player is inside of a music trigger with a different day/night track and the time of day changes between day and night, the music will not change. The player has to leave the trigger and re-enter to start the different track.

**Action triggers:** Start music via code in response to an action in game. Examples of this include the merchant theme when opening the merchant window and the sea theme when boarding a ship. They override any area trigger music that may be playing. When an action is finished (e.g. closing the merchant window or leaving a ship), the music fades. If the player was previously inside of an area trigger, that music will start to play again.

# Track List

Below is a listing of each XMI file, their track contents, lengths and any noteworthy information . A green track name indicates that it is referenced by the zone sound file and red indicates that it is not. There are no track names included in the files so I have tried to choose names that best represent where the music is played. For example, the music played in Ak'Anon and around the Aviak Village in South Karana are identical, but as it's a major city, I have chosen "akanon" as the track name.

Any name followed by an underscore and a number (e.g. heroism\_1) indicates that it's the same piece but may have slightly different instrumentation and or length.

The tables below use the following format:

Index	Zone Shortname	Length	Notes
-------	----------------	--------	-------

airplane.xmi - 71,634 bytes

0	akanon-2	0:57.350	Shorter variant
1	airplane_0	2:30.567	
2	entrance_fanfare-1	0:14.725	Pitched down
3	arpeggiated_runs	1:05.009	
4	airplane_1	1:27.463	
5	heroism-1	3:15.600	Different instruments

Note: There are no music triggers in this zone.

akanon.xmi - 63,974 bytes

0	akanon	2:06.792
