

I have created a campaign video with the aim to raise awareness on the effects Cyberbullying can have on an individuals health. The video is aimed at year 7 and 8 in order to socialise them from a young age to know the signs if someone is being bullied and what to do if they are being bullied. Your suggestions will be used to develop the video further and also create a learning resource/ lesson plan to go alongside the video as part of a learning aid. I aim for the video and learning aid to be send to schools when completed in order to meet my aims.

1. Do you think the video could be used as an educational resource? If so ,which age group would you consider using it with?
2. If so, how might you use it in a lesson, life-learning or pastoral session?
3. What are the most effective parts of the video?
4. Which parts of the video do you think are unclear or could perhaps be improved?
5. How did the video make you feel?
