

IIIF Event before Europeana Tech

This is a proposal to hold a IIIF event on the Monday before the EuropeanaTech event which is on Tuesday the 15th and Wednesday the 16th of May in Rotterdam. Further details for the EuropeanaTech conference can be seen at:

<https://pro.europeana.eu/event/europeanatech-conference-2018>

The idea would be to attract delegates to attend this event on the way to the EuropeanaTech. The Hague is suggested as a location as it is on the way to Rotterdam if you are travelling from Schiphol Airport. The current proposed details for the IIIF event are:

Date: Monday the 14th of May

Location: KB, The Hague

Duration and format:

- **Morning:** open outreach event with presentations from the community
- **Afternoon:** unconference style breakout sessions including sessions catering for:
 - People new to IIIF
 - Experienced IIIF institutions
 - Discovery/aggregation discussions?

Number of participants: 60

The event would be free to attend but funding would have to be found for the following:

- Room hire
- Lunch for 60 ppl
- Tea/Coffee break * 3

Potential people we could ask to present in the showcase:

- Europeana and members of its past [IIIF task force](#)
- Rob Sanderson - Getty
- Matt McGrattern - Digirati
- Tristan Roddis - Cogapp
- Ghent University Library
- People from the Europeana IIIF Task Force or the IIIF Outreach group who will be at EuropeanaTech
- National Museum Sweden

For information here is the schedule for the V&A event and the outreach part of the day could follow a similar format:

Time	Topic	Speaker	Room
9:00 - 9:30	Welcome Coffee	xxx	Foyer
9:30 - 9:35	Welcome & intro to the day	NDE / Europeana / IIIF	Theater
9:35 - 10:00	Introduction to IIIF	Rob Sanderson (Getty)	Theater
10:00 - 10:15	IIIF Community	Glen Robson (IIIF)	Theater
10:15 - 10:25	IIIF Museum	Etienne Posthumus (Brill)	Theater
10:25 - 10:35	IIIF Library	Dries Moreels (UGhent)	Theater

15:15 - 16:45	Hands on Session pt 2 (Glen)	Discussion Topic #3	Discussion Topic #4
16:45 - 17:00	Wrap up	Wrap up	Wrap up
17:00-18:30	Borrel	Borrel	Borrel

Event Description for EventBrite

On May 14, one day prior to the 2018 EuropeanaTech Conference, EuropeanaTech, NDE (Netwerk Digitaal Erfgoed) and the International Image Interoperability Framework (IIIF) will host a special day long IIIF Showcase and Workshop at the National Library of the Netherlands in The Hague. The event will provide those new to IIIF and those experienced with the framework and its tool a first hand and hands-on day filled with plenty of opportunities for discussions around sharing digital heritage collections with the world.

Over the past few years Europeana has turned its focus towards promoting and advocating for IIIF implementation by heritage institutes across Europe. This event will provide those in the Netherlands and abroad an opportunity to not just learn about what IIIF can do but to also begin working with it as well, giving participants a jump-start to adopting the standard at their home institutions.

On the morning of the 14th, participants will be welcomed at the National Library with coffee followed by an introduction to IIIF by Rob Sanderson from The Getty Institute as well as sectoral use cases from Dutch and international institutes already putting IIIF to good use. This morning will prove to be a spectacular showcase showing what IIIF is capable of facilitating and what our peers have gained from using the Framework.

The afternoon will allow for a hands on working session facilitated by IIIF's technical coordinator Glen Robson. The goal of this hands on session is to offer those new to IIIF a crash course in implementing the Framework, allowing them to go back to their institutes with something to show and first-hand experience. Alongside the hands on working session several unconference discussion session will take place regarding the growth, development and steering of IIIF.

Following the days events a "borrel" Dutch word for drinks and bites will take place in coordination with Wikidata allowing plenty of time for networking and mingling before the EuropeanaTech conference kicks off the next day.

About IIIF

IIIF is a community-drive initiative that has been adopted widely by libraries, museums, archives, software companies and other organizations in a remarkably short period of time. IIIF enables fast, rich zoom and pan delivery of images, manipulations, annotations, and the

assemblage or comparison of images from other IIIF-based resources across the web, regardless of source. The more repositories that adopt it, the better it becomes as a shared resource. For more information, see: <http://iiif.io/community/faq/>

Panel Questions

What were the initial motivations for your institute to get involved in IIIF?

What were the biggest roadblocks you faced / continue to face both technically and institutionally?

Where is IIIF lacking, in your opinion, i.e. what could be improved to better fit your institutional needs?

What were you using before IIIF?

How long did it take to get from idea stage to full on implementation ?

How was the implementation funded?

How is any ongoing work funded?

What do you give back to the IIIF community?
