Subject	Keen to serve Company Name as a Job Title !

Hello [Recruiter/HR Name],

I came across the job opportunity for **Job Title (Job post link)** from your department, which matches my expertise in the **Job Title Industry**.

I sincerely believe that my experiences align with the job responsibilities mentioned above, like **skill #1**, **skill #2**, and **skill #3**. Moreover, I do not consider myself an ordinary **Job Title** as I always keep **entrepreneurial skill #1**, **entrepreneurial skill #2**, and **entrepreneurial skill #3** in perspective. Therefore, thinking from **Industry 1 the position lies in** and **Industry 2 the position lies in** mindset makes me stand out.

If you think these qualities are a potential fit and my **job title** skills could be an asset to your company, I would love to get on a call and see if we can move forward.

Thank you so much!

Regards,

Subject	<i>Their First Name</i> , need a quick advice on XYZ

Hello [Recruiter/HR Name],

I came across your profile and was impressed by your journey in **[Company/Industry]**, especially your work around **[something specific from their LinkedIn or company]**.

My background is in **[skill #1]**, **[skill #2]**, and **[skill #3]** which directly aligns with the role that **Company Name** demands. But more importantly, I have never approached my work like a checkbox employee. I bring a mix of **[Leadership skill #1]**, **[entrepreneurial skill #2]**, and a sharp understanding of both **[Industry 1]** and **[Industry 2]**, which allows me to solve problems with a broader, more strategic lens.

I would genuinely love to hear your perspective on what makes someone successful in this role. Would you be open to a quick 17-minute coffee chat this week or next?

I understand you may have a packed schedule, but even passing this along to the HR on your team would truly mean a lot.

Regards,

Subject	"Job Title" at "Company Name" - Update

Hello [Recruiter/HR Name],

Did you get a chance to go through my last email?

I am eagerly looking forward to working at **Company Name** in the **Department Name** as a **Job Title** and bringing something new to the table.

Please let me know if there is anything I can do to make the process smoother.
