ABSTRACT

Sample text inserted for illustration. Replace with abstract text. Your abstract should give readers a brief summary of your article. It should concisely describe the contents of your article, and include key terms. It should be informative, accessible and not only indicate the general scope of the article but also state the main results obtained and conclusions drawn. The abstract should be complete in itself; it should not contain undefined abbreviations and no table numbers, figure numbers, references or equations should be referred to. It should be suitable for direct inclusion in abstracting services and should not normally be more than 300 words.

Keyword: Keyword, keyword, keyword, keyword, keyword

Introduction

State the objectives of the work and provide an adequate background.

Methodology

Methodology can be divided into one or more sections according to the research as needed. Provide sufficient details to allow the work to be reproduced. Replace with article text, including headings where appropriate. Figures and tables can be single- or double-column width as appropriate. During the production process, they will be placed at the top or bottom of columns after they are first cited in the text.

Result and Discussion

This part should explore the significance of the result instead of repeating it. A combined Result and Discussion section is often needed. Avoid extensive citations and discussion of published literature.

For figures and tables, please make sure to insert the citation at the bottom of the figures/tables. Figures should contain high enough quality for reference and please note that individual figure files larger than 10 MB must be uploaded separately. Please convert the images to one of the following formats:

EPS (or PDF): for vector drawings and embed the font or save the text as 'graphics'.

TIFF (or JPG): for color or grayscale photographs (halftones) and use a minimum of 300 dpi.

TIFF (or JPG): for bitmapped line drawings a minimum of 1000 dpi is required.

TIFF (or JPG): for combinations of bitmapped line/halftone (color or grayscale) a minimum of 500 dpi is required.

For tables, please submit as editable text and not as images. Number tables consecutively in accordance with their appearance in the text and ensure that the data presented in them do not duplicate results described elsewhere in the article.

Example of figure:

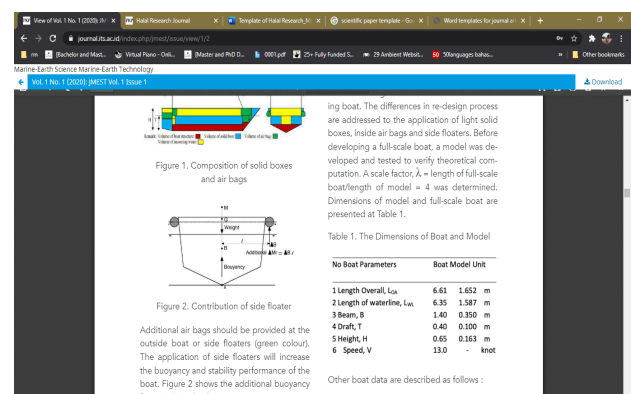

Figure. 1 Figure example

Example of table:

Table 1. Table example

Number	Example 1	Example 2
1. Font size is 11 pt. or if needed use 10 pt. with single spacing	A	D
2.	B	E

If the figures/table is bigger than the ones that have been provided in the example above, it can be placed at the centre of the page. Please do check our previous journal for your reference (JMEST vol. I)

If your article includes equations, please write the equation as editable text using the Equation Editor in MS word and not as images. The equation number is to be placed at the right side.

Conclusion

The main conclusions of the study may be presented in a short Conclusions section and should be standalone after the Results and discussion section.

Acknowledgements

This section is optional. List here those individuals or institutions that provided help during the research, e.g., financiers, providing language help, writing assistance of proof reading the article, etc.

References

Please ensure that every reference cited in the text is also present in the reference list. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. If these references are included in the reference list they should follow the standard reference style of the journal and should include a substitution of the publication date with either 'Unpublished results' or 'Personal communication'. Citation of a reference as 'in press' implies that the item has been accepted for publication.

Please use Zotero or Mendeley software for cite the reference automatically in the text and references list. The reference style can be downloaded at this journal site.
