

Dragon Quest 6 : Realms of Revelations DS - Any% - Stormsgate Castle manip route

Adapted from existing notes by Paraz10

A few things to know :

- Those notes are based on Highspirits' ones (<https://www.twitch.tv/Highspirits>), a copy of his note are available here (hosted by myself as they were a .docx file shared on the DQ RTA Discord) : [w DQ6_Notes_originales.docx](#)
- The main additions I made to this route is, in addition to adding 3 convenient manips for the Lucid Grotto metal slimes, the Casino slots, and the Metal King Slimes in the Dark World, to add a long manip at the Stormsgate Castle that manipulates the 4 boss fights in a row.
This removes the instability of these fights, as well as making them faster and makes grinding exp on random encounters pointless and allows skipping the Mini Medals entirely, as well as Goowain since he is only used in those fights.
This manip is complex because each of your characters have a variable amount of Experience at this point, depending mainly on how much they died, and how much backup Spiegel called during his fight. A character Lvl Up advances RNG by 7, meaning you have to realign your RNG before the 2nd boss, and to have multiple fights routed depending on your Lvl Ups after the 2nd and 3rd bosses.
- The seeds you get when launching the game depends on your console, so the manips in this guide won't work for anyone else with the stated dates and times
- Loading a quick save in the Overworld advance initial rng by 3, loading a classic save at Altrude Abbey advance rng by 2 (no NPC movement there)
- Seeds used for manips in these notes (on game boot) :
 - Lucid Grotto metal slimes : 0x809386B1
 - Casino red slots : 0x80938FAE
 - Stormsgate Castle boss rush : 0x809C7009
 - Dark World metal king slimes : 0x829782A1
- Stormsgate Castle Manip spreadsheet : [ti DQ6DS - Cloudsgate Manip \(Milly\)](#)
- Playlist with the manips made in DesMuMe : https://www.youtube.com/playlist?list=PLipZLK-wVKRAVqYSqw_4NFwDM36tczjkA
- ^ v

- Before the run :
 - Set the date to **2015-08-04** (YYYY-MM-DD) around **06h43**, set Flowtimer to **8s**
