

Bug in the Wild

[Walmart] Wedding registry find store never loads

Description

When trying to select a store for the wedding registry, the screen does not finish loading and leaves you at a screen showing only Grey and white over most of the page.

Replication Steps

1. Go to Walmart.com
2. Click Registry from the menu bar at the top of the page
3. Click the Wedding Registry picture
4. When that page loads, click the Find Store button under the Easy for Everyone section

Expected Behavior

Should load a page with information for selecting a store based on location.

Actual Behavior

The page goes to a grey and white screen and never actually loads.
