ABSTRACT

Abstract must be written in English. The abstract provides a general description of the contents of the paper and line spacing 1. The maximum length of the abstract is 250 words. If there are foreign terms that have not been standardized, they are written in italics. Citations are not permitted in the abstract section. The abstract should contain background/problems, research objectives/paper objectives, methods, results/conclusions and findings/impact to knowledge. If there are foreign terms that have not been standardized, they are written in italics.

Keywords: *First keyword, Second keyword, Third keyword, Fourth keyword, Fifth keyword, Sixth keyword; Alphabetic Ordered.*

I. INTRODUCTION

Jurnal Teknologi Informasi Mura (JTI) is a journal that publishes high-quality research papers in the broad fields of Informatics, Information Systems, and Computer Science, covering software engineering, computer systems, computer networks, algorithms and computation, and the social impact of information and telecommunication technology. Jurnal Teknologi Informasi Mura (JTI) publish papers every two months, namely in the month ofMarch, June,Septembeer, and December.

Manuscripts can be written in English or Indonesian..Article Title, Affiliation, Abstract, and keywords must be written in English. Authors are required to follow these writing instructions.**Manuscript length should be no less than 4000 words (excluding abstract, author information, and bibliography). The minimum bibliography is 2 pages.0references from journals/conferences in the last 5 years for research articles or 40 references from journals/conferences in the last 5 years for literature reviews.**If the author does not meet these requirements, the article will be rejected at initial evaluation.

The template for this journal can be found at https://jurnal.univbinainsan.ac.id/jti This document is a template for writing manuscripts in Jurnal Teknologi Informasi Mura (JTI). The manuscript is typed on standard A4 size paper (21 cm x 29.7 cm) with the formattwocolumns and single spacing. Use a margin of 2,0-1,5-1,5-1.5 cm (left-top-right-bottom), using Times New Roman 11-point font with 1 line spacing. Submit manuscripts to Jurnal Teknologi Informasi Mura (JTI) must go through the website at [website address].https://jurnal.univbinainsan.ac.id/jti.

The easiest way to write in Jurnal Teknologi Informasi Mura (JTI) is to directly edit this paper template by filling in the author's paper section.

Citations are written using sequential numbering from number 1 to the last bibliography.[1]Writing a bibliography can involve several bibliographies at once.[2]–[5]. The bibliography writing format uses IEEE Format [3], [4]. IEEE format can be seen in the Bibliography section of this template [1], [6]–[9].

The systematics of the manuscript include: the title must be written concisely and describe the contents of the manuscript, avoid writing subtitles or case studies in the title; author's name (without academic title); author's affiliation; email address; the name of the author marked * is the corresponding author; abstract (maximum 250 words) written in English; keywords (minimum three, maximum six); INTRODUCTION containing the background and objectives or scope of the writing; RESEARCH METHOD containing the formulation of the problem being studied in more detail (written mathematically as far as possible) and explaining the proposed

method; RESULTS containing information about the tests conducted; DISCUSSION containing discussion, analysis of results or comparison of results with previous research; CONCLUSION; REFERENCES (containing only referenced sources).

The introductory content includes the background, objectives, problem identification, and research methods, which are explained implicitly. Except for the Introduction and Conclusion chapters, chapter titles should explicitly reflect their content. They should not be implicitly stated as theoretical basis, design, or other information.

The introduction generally only covers 10-20% of the entire paper. Don't forget to include the research objectives of the paper.

2. METHOD

The content of the research method is to formulate the problem being researched in more detail (written as mathematically as possible), the research stages, and explain the proposed method. If an algorithm is used, it can be described in this section, along with current information about the technology.

The Research Methods section generally only covers 20-30% of the entire paper.

2.1Sub Section

This is an example of using subchapters in a paper. Subchapters are allowed in all chapters except the conclusion.

2.2Sub Section

This is an example of using subchapters in a paper. Subchapters are allowed in all chapters except the conclusion.

3. RESULTS

In this section, the results of the research and testing that have been carried out can be explained. The research results section should contain the chapters with the most content in a paper. Research results content can account for 50-65% of the entire paper.

3.1 Sub Section

This is an example of using subchapters in a paper. Subchapters are allowed in all chapters except the conclusion.

3.2 Sub-Sub Section

This is an example of using sub-chapters in a paper. Sub-chapters are allowed in all chapters except the conclusion.

3.3Sub-Sub Section

This is an example of using sub-chapters in a paper. Sub-chapters are allowed in all chapters except the conclusion

.

3.4 Sub Section

This is an example of using subchapters in a paper. Subchapters are allowed in all chapters except the conclusion.

3.5 Sub-Sub Section

This is an example of using sub-chapters in a paper. Sub-chapters are allowed in all chapters except the conclusion.

3.6 Sub-Sub Section

This is an example of using sub-chapters in a paper. Sub-chapters are allowed in all chapters except the conclusion.

3.7 discussion

The discussion should present the author's perspective on the research findings. It should also include a discussion of the research and comparisons with previous research. The discussion section can make up 10-20% of the entire paper.

3.8 Sub Section

This is an example of using subchapters in a paper. Subchapters are allowed in all chapters except the conclusion.

4. OTHER PARTS

This is an example of using another chapter in a paper. You may add other sections if necessary.

4.1 Sub Section

This is an example of using subchapters in a paper. Subchapters are allowed in all chapters except the conclusion.

4.2 Formula

All formulas or equations are written using the equation editor or Math Type (http://www.mathtype.com). The equation is written starting from the left margin, parallel to the sentence directly above it. The line spacing used between the equation and the sentences above and below it is 1.5 (one and a half) spaces.

Mathematical equations should be numbered consecutively within parentheses and must be referenced in the text. Equations are numbered with Arabic numerals within parentheses aligned to the right of the column. Symbols in the equations must be defined and may be written before or after the equation. Similarities should not be made in the form of screenshots or images.

$$f_{baud} = \frac{2^{SMOD}}{64} x f_{osc} \quad (1)$$

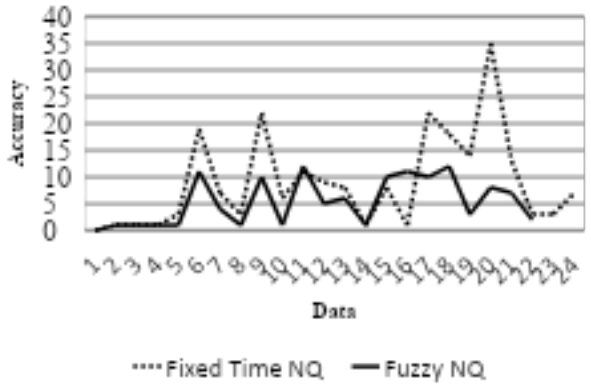

4.3 Example Tables and Figures

All tables and figures must be clear, not blurry, or unclear. The font size in tables and figures must be easily readable by the naked eye. The table or figure should be positioned at the top or bottom of each column on the page.

Table 1. Example Table

NO	Training	Testing
1	60	40
2	30	70
3	50	50

Make sure the table view is not cut off by the page. If the table view is not large enough to display in one column, the table can be displayed by combining two columns into one column (specifically for displaying columns).

Picture 1. Example Picture

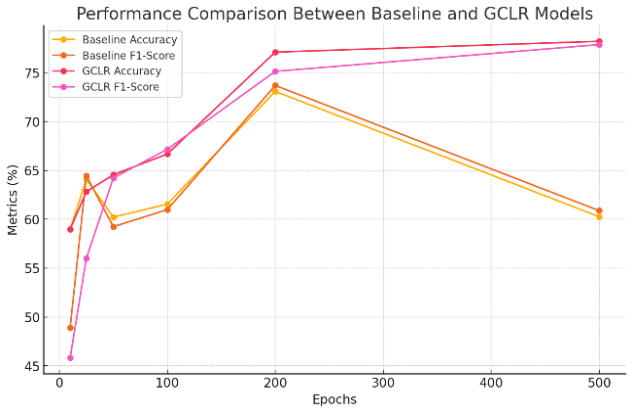

Figure 2. Example Picture

Additionally, make sure the author cites each table and figure, for example, to provide an explanation.table 1or forFigure 1Each image must be clearly visible, with a minimum resolution of 300dpi.

5. CONCLUSION

The conclusion is the essence of the entire paper. It is written in paragraph form, not in list form. The conclusion does not repeat the sentences in the abstract.

6. CONFLICT OF INTEREST

The authors declare that there is no conflict of interest between the authors or with the research objects in this paper.

7. CONFESSION

Acknowledgments should only be addressed to the funders or donors and the research subjects. Acknowledgments may also be extended to those who assisted in conducting the research.

8. REFERENCE

The primary references are international journals and proceedings. All references should be from the most relevant and recent sources (within the last 5 years).**The minimum bibliography is 20 references from journals/conferences in the last 5 years for research articles or 40 references from journals/conferences in the last 5 years for literature reviews.**References are written in IEEE style. Bibliographic sources listed in the previous bibliography must be referenced in the manuscript, written sequentially. It is recommended to use tools such as Mendeley, Zotero, or other reference management tools. Please use a consistent format for references (11 pt). Examples of Journal references are numbers [1], [2], and [3]. Examples of Conference references are numbers [4], [5], and [6]. Examples of book references are number [7]. Examples of web references are number [8]. Examples of thesis/dissertation references are number [9].

SHIPPING CHECKLIST (MUST BE INCLUDED IN THE ARTICLE FILE)

All items must be answered YES before being sent to Jurnal Teknologi Informasi Mura (JTI) to ensure the manuscript is well prepared and of a high standard. Please mark an X in the Yes column after checking each item.

General Format			
NO	**Goods**	**Of**	**NO**
1	I have prepared the manuscript using "JOF-Template.docx"		
2	Manuscripts are written in one or two columns using Times New Roman 11 pt font.		
3	The title is in accordance with the focus of the manuscript.		
4	I have the complete information of the author:		
	a. Affiliation of all authors		
	B. Indicate that one of the authors is the corresponding author.		
	c. Email of the corresponding author		
5	The manuscript length should be no less than 3500 words (excluding abstract, author information, and reference list).		
6	The manuscript contains the core contents: introduction with literature review, methods,Results, discussion, conclusions, conflicts of interest, references		
7	Contains a maximum of 2 levels of sections		
Abstract			
NO	**Goods**	**Of**	**NO**
1	The abstract is written between 150 and 250 words.		
2	contains the objectives		
3	contains research methods/approaches		
4	contains results/conclusions		
5	contains novelty/originality/important findings/impact		
6	The abstract is equipped with keywords.		
Number (if any)			
NO	**Goods**	**Of**	**NO**
1	All images are clear and easy to read (pictures, text, and captions) with high resolution.		
2	All images are presented in a formal style, without excessive titles.		
3	All information in the figures is written in English and all decimal numbers are written in international format.standard, use a period (.) instead of a comma (,)		
4	All images have captions (at the bottom) with sequential numbers.		
5	All figures are cited in the text using a consistent citation style.		
6	Never quote figures using the terms "under" and "above", but use numerical figures.		
Table (if any)			
NO	**Goods**	**Of**	**NO**
1	All text in the tables is clear and easy to read.		
2	All tables are formal in style.		
3	All information in the table is written in English and all decimal numbers are written in international format.standard, use a period (.) instead of a comma (,)		
4	All tables are annotated at the top with consecutive numbers.		
5	All tables are cited in the text using consistent citations.		
6	Never cite tables using the words "below" and "above", but use the table number.		

Similarities (if any)			
NO	**Goods**	**Of**	**NO**
1	All equations are written using the editor tool (editable), not cropped images.		
2	All equations are annotated at the top with consecutive numbers.		
3	All equations are cited in the text using consistent citations.		
4	Never cite equations using the words "under" and "above", but use the equation number.		
Reference			
NO	**Goods**	**Of**	**NO**
1	The reference list and citations consistently follow IEEE style.		
2	The name of the journal in the reference list should not be abbreviated, but written as the full name.format		
3	All references are cited in the text.		
4	In-text citations follow consistent general citation rules.		
5	The paper cites at least 20 reference.		
6	Book sources should not be more than 20% of the reference list.		
7	80% of references must come from journals/conferences.		
8	If the reference is from a journal, the journal name, volume, number, page and DOI must be mentioned.		
9	The number of self-citations in the list should not exceed 3.		
10	Write all authors in the reference list unless there are more than 7 authors (Write the first 6 authors,then et al.)
