SOLUTIONS

7PSolutions, LLC
136 N. Van Buren Street
Nashville, IN 47448
United States

7PSolutions is located in the heart of Nashville, Indiana, providing global GPS tracking and monitoring services around the world. We're looking for a sophomore-senior Technology Support Summer Intern. This important position requires action-oriented, self-starter, problem-solver, and responsive skills to assist our customer support team in a professional manner.

Job description

As a high school technology support intern, you will be responsible for configuring and programming 7P GPS devices. In addition, students would manage our device recycling program. Examples of work include programming, GPS device configuration, SIM card application and inventory organization. The student selected for this position should expect to work approximately 20 hours per week in the summer. We are looking for sophomore-senior high school students who are interested in a career in the high demand field of global technology. We are looking for students with a passion for hands-on work, the ability to think critically to problem solve and be comfortable working in a fast-paced environment. Life moves fast! If you want to prepare yourself now for your career after school, engage in purposeful work, and be challenged and inspired to grow, you should consider beginning your journey at 7PSolutions.

Qualifications

- We are looking for students with a passion for hands-on work, the ability to think critically to problem solve and be comfortable working with technology, in a fast-paced environment.
- This job position may require access to controlled technology or technical data.

Responsibilities

- As a high school technology intern, you will be responsible for configuring and programming GPS devices.
- Managing our device recycling program
- The student selected for this position should expect to work approximately 20 hours per week in the summer.
- You'll have the opportunity to work with our customer support teams to assist in the troubleshooting of devices and organization of our day-to-day operation
