

## Module 1: Organization and Homeostasis of the Human Body

### Lesson 3: Anatomical Terminology

- Locate various organs in the body using the basic anatomical terms for body position (anterior/posterior, supine/prone), direction (superior/inferior, lateral/medial, proximal/distal, superficial/deep), plane (sagittal/frontal/transverse), and compartments (dorsal/ventral).
- Identify the major body cavities, their membranes, and membrane layers
