

**Last update: January 11, 2025**

This is a list of Mega Man fangames—specifically, anything that LOOKS like a Mega Man prequel, sequel, interquel, spinoff, or crossover. This list does not include ROM hacks (eg, Rockman 4 Minus Infinity, Rockman 5 Air Sliding), games that only FEEL like Mega Man (eg, MegaMari, Nezumi Man), or bootlegs (eg, Zook Man Z). This list also does not include games that are unplayably glitchy, copy other games without adding anything substantially new, or lack enough gameplay or comedic value to justify a mention.

The title of every game is linked to the most up-to-date project or download page I can find. Note that some game titles have been slightly modified for organizational purposes, and that some game titles are purely speculative (particularly for non-English games and games without a proper title screen).

Highlighted in **light red** are games that appear to have become lost media, or that officially or seemingly have been canceled, abandoned, or backburnered without ever being released to the public in any form. Any information to the contrary is always greatly appreciated. In rare cases, games may be removed from the list entirely if development apparently ceased before any real progress was made.

To suggest any additions or changes to this list (including broken, outdated, or unsafe links), please leave a comment on [this discussion thread](#) or contact me [on Discord](#), [on Facebook](#), [on Twitter](#), or by e-mail at laffman85 [at] aol [dot] com. Don't request editor access to this document; I'll politely ignore you.

To see me play these fangames, watch me [on Twitch](#) (for live livestreams) or [on YouTube](#) (for archived livestreams).

\*Requires [Zelda Classic](#) to run.

†Requires [Headcannon Game Engine](#) to run.

‡Requires [BYOND](#) to run.

§Requires an [RPG Maker RTP](#) to run.

||Created by or in association with Capcom, but still a fangame as far as this list is concerned.
