EXPLANATIONS

- 01- I consider Mr. Pumpkin and Toy Pumpkin as Characters, since Jack-O-Lantern and Mr. Cupcake are, I didn't add the FNaF 3 Pumpkin because it's way too similar to the FNaF1 one.
- 02- While Phone Guy and Phone Dude are Humans, they are represented by the Phones, Phone Guy even is an Enemy in UCN, so I think it's worth to add them
- 03- Foxy and Mangle Plushies are implied to literally be Nightmare Foxy and Mangle, so I consider them to be Variations of them, Freddy Plush is implied to be just a Plush tho
- 04- Endoplush, while only appearing in FNaF World, is literally Plushtrap's Endo, so I took his Endo from Help Wanted and added him like this
- 05- While Electrobab bears almost no difference from Bidybab I wouldn't accept not adding them, while Minireena 2 is literally just Minireena with a different lighting
- 06- If the Trash and Gang are Characters, then Ballpit Tower, Sanitation Station, Winking Sign and the Paperpals are also Characters
- 07- Bouncepot an Coffee, while having not to do with FNaF, appears as Easter Egg in UCN and Help Wanted, so that makes him a Main Game Character
- 08- Monochrome Freddy appears in the UCN Office and in TFC Cover, so he is in the Main Games and got some recognition
- 09- Tape Girl was added for a similar reason to Phone Guy and Dude, while a Human, she is represented by the Tapes, so I think it's fair to add her as well
- 10- Vanny, while a Human, wears an Animal Costume, making her similar to the Animatronics, and I think she deserved to be added
- 11- Freddy Forstbear and 8-Bit Baby are NOT Skins, they are classified as Unique Characters in the Files, and Frostbear existed BEFORE the Skins were implemented
- 12- While Shattered Bonnie and Burned Carnie are just Props, they are depicted in Help Wanted 2 Extras, so they got some recognition
- 13- The Nightmarionne Plush from Security Breach is implied to be alive and have some big relevance, so I consider them to be Standalone Characters
- 14- Springtrap Cutout is also implied to have some sort of consciousness, so I consider him a Standalone Character as well
- 15- The Faz-Force, while just Toys, are actually Variants of Freddy, Chica, Bonnie, Foxy, G. Freddy and Puppet, even having unique Names
- 16- Logbook Chica appears at the end of Survival Logbook, which exist in the Series Universe, so I consider her as a Character
- 17- Prototype, Ballboy, P. Goon, Bubba, Browboy, Mad Endo, Gold Endo and Purplegeist all are CLEAR References to Characters from the Main Games
- 16- Security is seemingly a reference to the Security Guards, and he got a quite big role in the Game so I wanted to add him
- 19- The Mediocre Melodies seems to be a reference to Porkpatch, and El Chip si a reference to Chipper, so I added them as well as Chipper's Variants
- 20- Chica's Magic Rainbow is depicted with the Toys in the Survival Logbook, implying she exists in the Main Games in someway
- 21- Baby Crawlers, while seemingly being equivalents to the Bidybabs, got a completely different Design AND name, so I consider them as Standalone Characters
- 22- And for Animdude, come on, he is literally Scott himself and got a HUGE Role in FNaF World, I HAD to add him

EXTRAS

It took me over **4 Years** to finish this Render, originally there wasn't even Security Breach Characters on it, and when I decided to add them it became way too much for my PC to Render it, only literally 2 Weeks ago I got a new RAM and managed to Render it, even being able to add many more Characters!

If I were to add all the Skins from SD (+49) and all the Characters from FNaF World (+58), then there would be **387 Characters**, also don't expect me to add anything that will be Released after the 10 Years and much less the Books that are not referenced in Into the Pit Game.

I planned to add Human Characters as well, however due to how ambiguous the identity of certain Characters are, I scrapped this idea, but if I were to add Humans, they would be 12, these being:

- Michael Afton
- William Afton
- Elizabeth Afton
- Crying Child
