OOO Description

Named as a play on words to allude to the first conversation between Suits and Grishokk about opening the Redscar Bar, Suit's specialty in remedial drinks that makes it a "Recovery Bar", and most importantly, its true purpose; to provide a calm place for the legion to come to relax. Like rebar, the legion's bar is there to provide home and support to all its members to further reinforce its strength by relieving tension with comfort and community.

IC Description

With the little corner bar handed to him, Suits brought his dreams of running his own bar to light! What was a drab little corner has been built up with shelves of liquor on the back wall, a generous string of lights framed by boho drapes, and a calm violet atmosphere granted by a lighting system reminiscent of LEDs that runs entirely on a simple pump system, moving a fluorescent, glowing fluid that bubbles in the tubes all across the bar itself as well as the liquor shelves on the back wall. The stools at the bar are plush-top, and the decor our barkeep has chosen consists mostly of herb hangers and framed diagrams fit for a potion shop, as well as a lovely potted palm in the corner! Welcome home legion. There are menu booklets available at the counter for your convenience.

Reminder!!

The menu is tentative! Always feel free to make a request either ICly or OOCly to Suits if you would like to see something added!

Discord will be updated with new and seasonal drinks and potions first so don't forget to stop in and check it out!!

♥♠Suits' "Over the Counter" Remedies♣♦

"Legion's Rejuvenation" (Health Potion)

Rather than your typical ruby red or sickly green bitter swill, this health potion swirls with a pale blue sparkle and a faint glow, the aroma when you take up the glass or pop the cork on it is a sweet berry scent that is tart just enough to tickle the nose and the bubbly sizzle of carbonation can be both heard and felt once brought close. The taste is a sweet-tart mixed berry compote that hides the bitterness of the typical herbal remedy, with notes of Tundra and Moon berries as well as the subtle sour bite of just the right amount of Sour Stormberry to catch your attention.

The brew is both calm and sweet, with a touch of spark to recover your vigor.

"Legion's Redemption" (Sobers you up a bit!)

Served hot off the press, this tall mug comes steaming with notes of warm cocoa, coffee beans, cinnamon, and caramel all assaulting its aroma at once. It's a smooth, warm starfire espresso, brewed over a bed of melted chocolate sweet enough to make you think Love is in the Air in the middle of September, and then covered in a bed of steamed milk and lightly drizzled with caramel and dusted with cinnamon. It's smooth, sweet, and sure to wake you up without the bitterness of blackrock coffee.

Not available to-go

"Succor Sour" (Antidote)

Bruiseweed and Bitterblossom hidden under sour green apple flavor that will make your lips pucker and your nose scrunch up from the tartness of it, it's still and slightly viscous, but spiked with just enough vodka to make it worth the shot. Once the sourness subsides, there are hints of strawberry and Zeb'ahari kiwi that linger just long enough to convince you that it wouldn't be so bad if you had to do another. Definitely better than the alternative.

Custom remedies available for order in advance

Make any drink an “Ace”

Need a pick-me up beyond just what lays on the menu? Maybe a berry flavored health potion isn't for you? Collect your aces and order it how you like instead! Making a cocktail an “Ace” will add a custom flavored potion that will pair well in any cocktail, but only so many potions can be made effectively with different ingredient options so anything beyond the following list may require a request in advance to allow for experimentation!

♥♠Suits' Sweets Shoppe and Aggressive Brews♣♦

"Wise Man's Gummy Wyrms"

A small pouch of Gummy Wyrms enhanced with the ability to assist in speeding up those pesky spells that take a little longer to cast. Give your brain a break! (Haste Potion)

"Healing Hearts"

A little box of candy hearts with sweet sayings on them, they do a small amount of healing per-heart and are slightly addictive so do take them in small dosages and no more than one at a time please! Assorted berry flavor (Small Healing Potions)

"Stealthy Sugarsmokes"

Sugary candy cigarettes that taste like chewing on sugar cane and when lit activate a small stealth field enough to shroud one person from view! These smokes are odorless and work like an invisibility/stealth potion for as long as they're lit and will burn out as fast as you smoke them so take your time! (Stealth Potions)

"Lifeweave Lollies"

a medium sized heart-shaped lollipop with a sweet cherry-lime flavor and a hint of peacebloom, it'll heal you up a great deal but over a long period of time! Best enjoyed after you're finished giving them fel! (Large Healing Potion)

"Mellow Mallows"

Loaded with peacebloom, dreaming glory, and nightmare vine and mostly indistinguishable from a normal marshmallow if not for the faint herbal smell, best keep these ones away from your campfire supplies. (Sleep Potion, Basically a melatonin gummy)

"Sober Stars"

A jar sits on the corner of the bar, filled with star-shaped candies that have a rich coffee-flavor with hints of caramel and chocolate, that should calm that hangover of yours. (like a starfire espresso, blackrock coffee, or cup of kafa, these will help you sober up a bit!)

"The Dark Iron Dragon"

A volatile brew of violent orange that sparks with pops of red and white like a flame has been lit within is tightly sealed within a runed potion bottle handed over in a padded box. This mix of Dark Iron Fireball Whiskey, Firebloom, Honey, and a hint of Blackrock lager, burns like felfire going down, and comes back up with the strength to smelt ore or melt down tough metals when in contact with fire. I don't blame you if you don't want to drink it...just give it a good throw, it's just as likely to ignite from a light spark on impact (Volatile Fire Elixir)

Comes with a Legion's Rejuvenation to-go and a handful of Frostfern Mints

Only Available to-go

Molotov Cocktails

A simple bottle with a mixture of alcohol, gasoline, and...is that...glitter? Of course it is.
