

TIKTOK COURSE

MODULE 1: GETTING STARTED

1. Understanding Proxies

One of the biggest problems creators face on TikTok is that the algorithm often limits their reach to the country they're physically in. For example, if you're outside the U.S., TikTok will mostly push your videos to local audiences instead of the U.S. market, even if your goal is to promote content to American viewers. This means your growth can stall and your promotions won't reach the right audience.

The solution is using a proxy. A proxy allows you to appear as if you're connecting from the country you're planning to target, even if you're somewhere else. By using a U.S.-based proxy, TikTok will treat your account like it's in the United States, and your content will be shown to American audiences. This not only solves the problem of limited reach but also makes your promotions far more effective, since you're targeting the market that actually engages with the type of content you will be promoting.

- **Where to get a proxy?**

[Floxy.io](https://floxio.com/) remains the top choice for creators, known for its reliable quality and affordable pricing.

On the Floxy website, go to **Proxies** → **ISP**, then select the country you want your proxy to target and complete your order. After purchase, verify your proxy by visiting **whoer.net**. Make sure your IP shows a **0 Fraud Score** and that the **DNS country matches the proxy country**.

This confirms your proxy is clean and ready. If the **Fraud Score isn't 0** or the **DNS country doesn't match the proxy country**, contact IPRoyal support and request a replacement that meets these criteria. Explain that you cannot work with the proxy you received.

- How to set up the proxy?

For this strategy to work, it's almost essential to use a **spare phone** dedicated to TikTok. It doesn't matter if the phone is old or new — the only requirement is that it can run the TikTok app and upload content. Using a separate device prevents your real IP from leaking, since the phone will be used only for posting and generating income.

There is a slight advantage for Android users with **4GB of RAM or more**, as this unlocks the HD upload option. For iOS, any device from the **iPhone 8 or newer** is sufficient.

If you don't have access to a spare phone and cannot purchase one, Android users can use a [mod APK workaround](#) that allows targeting the desired country directly.

Proxy Setup Tutorial:

Android	IOS
1. Factory reset the phone and remove the SIM card. 2. Set language to English and time zone to EST or PST. 3. Skip Wi-Fi and extra setup, decline Google services. 4. Once you're done with the setup, head onto the settings. 5. In Settings, disable Bluetooth, Location, and Google Emergency Services. 6. Check Date/Time and Region, set back to U.S. if it changed. 7. Open the Weather app and switch to U.S. if it changed 8. Connect Wi-Fi, download the Super Proxy APK in Chrome, connect proxy, then clear cache and data of all Google apps. 9. Enable "Always On VPN" 10. Head onto Google Play, Make a Google account and install TikTok.	1. Factory reset the iPhone and remove the SIM card. 2. Set language to English and Region to US. 3. Skip extra setup, decline Apple services where possible. 4. Once setup is complete, go to Settings. 5. In Settings, disable Bluetooth, Location Services, and Analytics & Improvements. 6. Check Date/Time and Region, set back to U.S. if it changed. 7. Open the Weather app and switch to U.S. if it shows your local region. 8. Connect to Wi-Fi, Make an Apple ID account with the US region, you can use your local phone number for verification. 9. Download Potatso and setup the Proxy.

2. Tiktok Account Setup/Warm-up

Step 1: Create your TikTok account

Step 2: If you used a regular email or phone number, verify it immediately.

Step 3: Enable **Two-Factor Authentication (2FA)**.

Step 4: Set up your profile, add a profile picture, name, username, and a short bio.

Step 5: Begin using TikTok naturally.

Step 6: Spend **30–60 minutes occasionally scrolling** over a period of 3-4 days. The longer the warm-up period, the better.

Step 7: Avoid liking/Following/Searching the first day, you can begin interacting like a human being starting the second day. (searching for your niche might help targeting the right audience.)

Step 8: you can begin posting your first video.
