{firstname} important questions about Voisi answered

Mail:

Hello {firstname},

The new multi-AI voice software, VOISI got launched just 3 days ago in the market and has generated really positive interest.

A lot of people have already started using Voisi to create content, narrations and conversations in multiple languages.

I got some questions too and I am putting together this little referral that has all the common questions answered. Take a look in case you have similar ones.

1. How do the credit system works?

Voisi is multi-AI. It's got Microsoft, Google, OpenAI, Amazon & IBM. All AIs have different costs. There is a credit system inside that gives you centralized access to all of the AIs from one place.

We give you 20,000 credits to get started and it takes 10 credits per minute of audio.

You can create a lot of audio! You can buy more credits inside for a very affordable price.

2. How much does it cost to buy more credit?

Voisi's mission is to make marketing accessible and affordable so it's not overcharging like the competitors. You can buy 1,000 credits right now for \$1.

Credits are not going to keep your marketing journey down.

3. Does Voisi have Voice Cloning?

The right answer is Yes! Voisi has voice cloning now and you can use your cloned voice in any narration or conversation project.

4. Can it really do conversations?

Yes, that's a special feature in Voisi. Again, the target is to allow you to create new forms for content.

You can create conversations, podcasts. You can use them in YouTube videos or you can create fantastic Podcasts on many different platforms using Voisi.

When you target fresh content like that, you get rankings because the keywords are not saturated.

5. Is it easy to use?

Voice generation with AI is hard, Voisi is easy.

When I watched the demos of other voice and language apps and used a couple and I realized it took a lot of work. All they did was do voice to text or text to voice.

Voisi takes away the hard work from voice and language tasks.

6. What is automation about?

Most content creators do the same things every day. It's over and over the same processes. Same languages, same content types.

For example, you may want to convert your blog to French for your European audience, and obviously you will want to convert every single article that you write now and in the future.

Automation makes things easy. You can just set it up once and then do your voice and language conversions in minutes, not hours.

7. So can it automate my work?

Yes, Voisi does make things very easy for you. You can do the following automations with it

- ✨ Voice to voice
- ✨ Voice to text
- ✨ Text to voice
- ✨ Text to text (translations)
- ✨ Voice cloning
- ✨ Music generation
- ✨ 100s of languages

Whatever is voice and language related, Voisi will do it.

8. Will there be more AIs in the future?

You bet! Voisi is going to be updated and new AIs are being added all the time. It already is the most powerful voice & languages AI app in the market and is getting more and more powerful.

Why didn't you get Voisi yet?

⚠ Important: Voisi Lifetime deal is a one time special launch sale.

Voisi AI is on a lifetime sale but that's an event. You can grab it now and you will never have to pay for it again.

Get it before this offer goes away.
