

Serge Bataliack

Regional Strategic Health Information Officer | Coordinator of African Health Observatory

Data, Analytics, and Knowledge Management (DAK) Team,
Office of the Assistant Regional Director (ARD)

World Health Organization | Regional Office for Africa

Bio-Sketch

He coordinates the operation and development of the Integrated African Health Observatory, as well as the development of the National Health Observatories throughout the Region. He also supports the generation of knowledge products needed for decision making specifically the production of Atlas of health statistics, fact sheets, policy briefs, conduct of comparative studies, development of detailed health profiles, and supporting health policy dialogue events as well as capacity building of Member states in these areas. He is also a key player in the work on innovative approaches to ensuring strategic health information is available, specifically focusing on functioning of health information systems in the Region and harmonizing the work on digital health. He also led efforts to bring together stakeholders in the region supporting development of similar knowledge products, such as the Platform of Health Systems and Policies working with other international partners such as London School of Economics and Political Science, European Observatory and BMGF.
