Will the image quality be better than something like the [YI 4k action camera](#)? I would say yes, however at a price of \$399 (hero 5) vs \$249 (yi 4k) Will it be worth it for most people? Don't forget there is also the new [Sony FDR-X3000 at \\$399](#) with optical Image stabilization.

[Karma](#) is a gopro built drone with a 3 axis handheld stabilizer that folds up and comes in at under \$800.

[Sony G 18-110mm](#) coming stateside for \$3500, looking like a real proper ENG lens for the FS5 and FS7. Maybe pretty pricy for someone to own, But so far looks impressive.

[Atomos Adds 4K60p HDR to the Inferno!](#) A lot of customers are going to be happy with free HDR upgrades to their new recorders. I think this helps to show that HDR is something that will come people's homes, following closely behind 4k.

A7s II is down to \$2700 new
