Terms of Service

- I may not accept every commission request I get, some subjects I just may not feel passionate or comfortable about drawing.
- I will only start a commission after receiving payment.
- Most minor changes can be done free of charge. ONE major change session is allowed during the sketch process. Any major changes following in the sketch phase may be subject to additional charges. Any major changes during the lineart or color process may be subject to additional charges.
- The time a commission will take depends on the type of commission and my workload at that moment in time. Duration can vary from days to months, please let me know if there is a certain day you need a commission by, and I will work with you to accommodate that.
- You cannot claim the commission as your own art. You cannot edit or crop the commission in such a way that my signature is removed. You cannot use your commission for commercial purposes unless we discuss it prior. You cannot put your commission through any AI filter. You cannot use your commission in NFTs.
- You can reupload your commission anywhere as long as I am credited. I will post the commission as well but I will ask if you wish to remain anonymous or credited.
- Payment is expected through a PayPal invoice sent to you. Prices are in USD.
- You may ask for progress pictures, and I will send progress pictures myself during various stages of the piece, but please respect that I may not always have progress to show you depending on my workload at the time.

If this is not possible and a realistic painting is still desired, I will find my own model to use as reference. Stylized paintings do not require a face claim.
