iPhone - Installing PowerSchool Mobile App for Parents

Please follow these instructions to install and use the PowerSchool Mobile app for parents on your iPhone. But before you begin, make sure you already have your Parent account username and password. If you don't have the information yet, please contact your student's school office to request that information.

PLEASE NOTE: This app will only work for parent users. It will not function for students or staff.

1. Make sure that you already have an Apple Store user account. The PowerSchool app is free, but you must have an App Store account to download it.
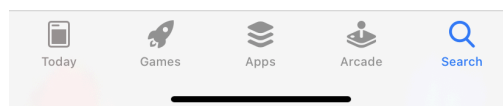

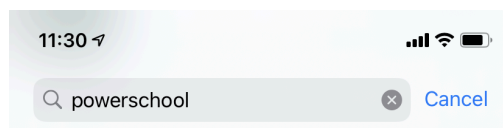

2. Open the Apple App Store on your iPhone:

3. Type "powerschool" in the Search Bar and tap "search"

4. You should see **PowerSchool Mobile** as a choice to download. Tap the download button:

5. Once the app is downloaded and installed, tap on the app icon to launch it.

6. The app will request permission to send you notifications.

   By choosing "Allow" PowerSchool will be able to notify you about important updates for your students.

   If you choose "Don't Allow" then you must launch the app to see all grades and student information.
   You can change notification settings later by choosing the Settings app:

   Then scroll to the bottom and find the PowerSchool app:

   Tap on it and then tap **Notifications** to change the notification settings.

7. Enter the four character DISTRICT CODE for Northern Lebanon School District:

P N L X

8. Tap **Continue**

PowerSchool

To sign in, we need to know your district.

DISTRICT CODE

| P | N | L | X |

Where's My District Code?

Continue

I Need An Account

9. Enter your username and password to login

10. After you successfully login, you will see your student's current sections grades and other important information.
