Motion for conference, House 4/26/Senate4/27; First Conference meeting 5/3

Description of the Issue: The house passed strong Omnibus bills with critical environmental protections. We are calling our state senators and asking them to **adopt the house language** of all 3 bills as they are debated in the Senate..

Who to call/contact: Your state Senator: <https://www.gis.leg.mn/iMaps/districts/>

Sample Script:

Dear Sen

I am calling regarding the 3 Omnibus environmental bills, Transportation HF1684, Environment and Natural Resource HF1076 and Commerce Policy & Finance HF1031. I am a member of Indivisible Saint Paul and a constituent (if applicable).

The house passed strong Omnibus bills moving Minnesota's energy production and use towards a carbon -free future and protecting our waters, air and land. They've included measures that help address environmental justice and ensure that our vehicle infrastructure supports an expanded future with electric vehicles.

I am calling to ask that the Senate adopt the stronger environmental protections as presented in the house versions of these bills. Please leverage whatever relationships you may have with conference committee members to amend the senate versions to protect our waters, air and land and continue moving towards a more just carbon free future.

Thank you.
