* corresponding author

ARTICLE INFO

ABSTRACT (10PT)

Article history:

Received May 27, 2021

Revised Sept 20, 2021

Accepted Oct 11, 2021

Keywords

Type your abstract here (10 pt), maximum 200 words

Background: Write abstract, which is a summary of the article. In background contained the research objectives

Method: Overview of the method used.

Results: Write your main result.

Conclusion: Relate to your objectives.

1. Introduction (*Heading 1*) (bold, 11 pt)

The manuscript is written in English with Times New Roman (11pt), 1 (one) column, 1.00 spacing, on A4 paper. Authors are asked to send in the form of files typed with MS-Word program and submitted via OJS by address <http://seminar.uad.ac.id/index.php/uphec/index>

The number of paragraphs is not limited but should include background, research objectives, research positions on previous research and novelty. A few theoretical foundations that are directly related to the content of articles can be included. It is not necessary to create a title (sub-chapters) in the introduction.

Files must be in MS Word only and should be formatted for direct printing, using the CRC MS Word. Figures and tables should be embedded and not supplied separately.

To avoid unnecessary errors, you are strongly advised to use the 'spellchecker' function of MS Word. Follow this order when typing manuscripts: Title, Authors, Affiliations, Abstract, Keywords, Main text (including figures and tables), Acknowledgements, References.

All **tables** should be numbered with Arabic numerals. Every table should have a caption. Headings should be placed above tables, left-justified. Only horizontal lines should be used within a table to distinguish the column headings from the table's body and immediately above and below the table. Tables must be embedded in the text and not supplied separately.

References must be listed at the end of the paper. Do not begin them on a new page unless this is necessary. Authors should ensure that every reference in the text appears in the list of references and vice versa. Indicate references by (1,2) or (1) in the text.

Use **Mendeley** as your reference manager (if possible) – **Vancouver** style

2. Method

Write your method in as detail as possible, so that it is possible for other researchers to reproduce your research. Please include information about: study design, setting (time and place). Write your method continues without a section. You **should** submit your revised paper along with a similarity report (less than 25%).

Also include information about population and sample, data source and how you collect the data. Variable included, the analysis clearly

Last, information about ethical approval for research involving human and animal subjects [*mainly for articles addressing to be published in a scientific journal*]

3. Result

The result should be contained the result of your research. Cite Table and Figure on your result texts

- Table 1.** The title of the table should be placed on the top-centre of the table. The title should be clear and reflect the result

Variable	Number of Cases (Person)				Population Density (people / km ²)				Housing Density (units / km ²)			
	2017		2018		2017		2018		2017		2018	
	n	%	n	%	n	%	n	%	n	%	n	%
Xxxxxx	11	11	11	11	11	11	11	11	11	11	11	11
Xxxxxx	55	55	55	55	55	55	55	55	55	55	55	55
Xxxxxx	22	22	22	22	22	22	22	22	22	22	22	22
Xxxxxx	32	32	32	32	32	32	32	32	32	32	32	32
Xxxxxx	47	47	47	47	47	47	47	47	47	47	47	47

5. Discussion

The discussion should be described concisely. Discussion should involve the significant findings presented with relevant and extensive discussion.

6. Conclusion

Provide a statement that what is expected, as stated in the "Introduction" chapter can ultimately result in "Results and Discussion" chapter, so there is compatibility. Moreover, it can also be added the prospect of the development of research results and application prospects of further studies into the next (based on result and discussion).

Acknowledgment (HEADING 5)

State the research funding (if any) or state, "This research has not received external funding" for research without a donor.
