
The steps

1 Go to the official page

Visit gemini.google/students — use your country's version if you're prompted (e.g. [/au/students](https://gemini.google/au/students)). This is the only site that runs the real signup; anything else claiming to offer this isn't legitimate.

2 Sign in with your personal Google account

Use your regular Gmail, not a school-managed address — school Workspace accounts are generally excluded from this offer.

3 Start verification through SheerID

Click “Claim a student plan.” You'll be handed off to SheerID, Google's identity verification partner — this is the actual check that confirms real student status.

4 Verify your enrollment

Make a Fake Student ID For verification and upload it or use any friends ID for verification by altering the name and collage name it will take 2 min to verify but it works 90% of the time.

5 Add a payment method

Required to activate the free period, but you won't be charged until it ends. Set a reminder before then if you don't want it to auto-renew.

6 Confirm your plan

US students typically receive Google AI Pro free for 12 months; most other countries receive Google AI Plus. Google assigns this automatically by region.
