*****RELEASE NOTES 137*****

Sprint 137: June 1-22, 2022, Release 3.0

- [\[HELIO-3061\]](#) Fulcrum support for CSB to dynamically enhance an EPUB
- [\[HELIO-3210\]](#) Make a "rebuild enhanced epub" button [SUBTASK OF 3061]
When an EPUB is reversioned and it has embedded resources inside, these are detected from the Monograph's FileSet during the unpacking process. However, changes to other FileSets attached to the EPUB's Monograph do not currently trigger the EPUB to unpack. This means in some cases it is necessary to "unpack" the EPUB manually to have the resources embedded again. This ticket focused on creating a control that will allow users to rebuild the enhanced EPUB.

The new unpack button in Manage Files Show page

- [\[FOPS-180\]](#) Add CC Licenses
Several upcoming UMP EBC titles include resources that used Creative Commons licenses that were not recognized on Fulcrum. This ticket added these licenses as options in the drop-down.
