

# THE NO FAIL BUSINESS FOR 2022

Discover How To  
Turn Your Smart  
phone To A  
Making Machine

And

**MAKE MONEY BY HELPING  
PEOPLE**

Joel adeleke

Hello!

I personally Welcome you for making an attempt to read this life changing e-book

This will be quick, because I'm not here to waste your time...

I'm here to show you how you to build a NO FAIL online business that generate massive income on demand

The ebook covers what you need to know about a business model called Affiliate marketing and how it works

Who is this book for

If you are a someone who is passionate about making legitimate money online

Or

you are a business owner, employees who want to make extra income online

Then, this is for you

In this ebook I will try my best to explain in a simple way you can understand

It requires no online experience. Meaning, even it doesn't matter if you haven't done any online business before

Just read through and you will understand how the own thing works at the end

Before I proceed I'd like to introduce myself to you. My Name is Joel Adeleke. I am an entrepreneur and online marketer and a coach.

I have been in this online make money business for the past 5 years. trying to find a legitimate business that will make my work at home dream come true. Invested in a lot of businesses like cryptocurrency [ trading,mining and investment], sports arbitrage betting,MMM, MLM business and other get Rich quick business.

I made some money

Most of them failed

which make me lose hope in my work at home dream

But one thing I know is

They has to way but I can't just find one because every business that was introduced to me then I turned it down based on what have been through

One day I saw a message from a friend, telling me about a business that has been paying his bills within 1 week of starting out.

*I was like hmmm, that is how all works..*

*you will soon see the bad side*

I was on my Facebook news feed one morning when I saw his post having breakfast in one of the biggest hotels in Lagos. I was like is this not my friend who told me about a business 3 months ago

Truly what he is doing is actually the real deal.

That's how I came across this business model through affiliate marketing.

So what is **Affiliate Marketing**

Affiliate marketing is a system where an affiliate marketer can earn a commission for marketing some else's product or service. The affiliate marketer searches for a product they enjoy and then promotes that product or service to earn a percentage of the profit from each sale.

**In my own definition**

Affiliate marketing is a business model that enables people to make commissions just by helping solve their problem..

Because you are only helping people by showing them a solution to the problem they will to solve

Affiliate marketing has been around since the early days of the internet and is only seeing a sudden in interest recently so it's not some kind of business that show up for 1,2,3 years and later you see them no more

As a matter, I have a mentor who has been into affiliate marketing since 2000

## **How does affiliate marketing works**

When you recommend a product or service to someone who want to solve a particular problem, you will get a commission between 30% to 85% commission. Some even pay up to 100% commission

Now imagine you promote a product of #50k with 50% commission and you were able to make 10 sales in a month. That's #250k. Which is not even hard to do even as a beginner..some are even doing far better then that

Affiliate marketing is only about promoting Nigeria products. In fact, most people make their money in dollars and you can also earn the same

You just need the knowledge and a proven system that shows you how to set things up

This business model is unlike network marketing or any other referral program where you will be told to bring in people into their company

In Affiliate marketing, you don't go after people. People come to you for a solution.

You might not be aware but let me tell you, for every product you buy online, every software you download online there are some people who are making money from it without you knowing about it..

You might be thinking.. I don't buy things online. Yeah but some people does

In fact, most people are fond of buying things without leaving their comfort zone

According to Statista, Affiliate marketing is a multi-billion dollar industry, and spending in the U.S. alone is expected to reach over \$8 billion by the end of 2022.

*So how do you tap in this business locally and internationally?*

## **The Concept Behind Every Affiliate Marketing**

### **MINDSET**

Before you can actually make an income online, you have to kill your old mindset.

Like,

Will people buy from me

Is this product not too expensive for people to buy

And other mentality relate to human ability to buy things..

This business works based on data not by self imagination

Most people buy what they want not what they need

Take iPhone 13 for example.. how many people do you think they bought iPhone 13 based on the fact that they need it

If my estimation is right, it should be 30/100.  
That's exactly my point.

Most of them bought the phone because they want it maybe someone of their friends are already using it or they just feel like making people know their worth ..not that they actually needed it for an important purpose

So it is a mistake for not promoting the iPhone 13 to them by thinking about the country economy and the rest

It is very important you take note about this

### **How can I promote affiliate product or services**

*It's nothing complicated*

This is how it works

All you have to do is to learn and follow the process

#### **Step #1: Decide on a platform**

This is where you get to decide on which traffic source you want to use  
Here are list of source you could

Facebook organic marketing  
Whatsapp marketing  
Email marketing

Blogs  
Youtube

All you have to do is choose one of those platform for a start and start promoting attracting hungry customers. After you have master one then you can now choose other platform to scale up your business

## Step #2: **Pick a Niche**

NICHE is also known as market.. before you choose any product you want to promote, you need to choose a market/ industry you are passionate about. This has to be something you are passionate about. What you can talk about all day long

Here are list of profitable niche you could choose

Make Money Online.  
Finance.  
Travel.  
Fitness.  
Personal Development.  
Relationships.  
Lifestyle.  
Real Estate.  
Pets

## Step #3: **FIND A HIGH PAYING OFFER**

Let's say You choose a fitness niche or make money online. You need to choose a product that align with your niche

Let's say you choose make money your product will have to be online marketing training, cryptocurrency, copywriting, graphic design, content writing and others

So you have to sign up for an affiliate company that has the product you want to promote..

Affiliate company like jvzoo, flipkart, warrior plus, more niche, offer vault pays in dollars for every sales

while affiliate companies like expertnaire, learnoflix, jumia are Nigeria affiliate companies.. they pay their commissions in naira

Though you will have to pay 10k before you can register on expert naire.

But don't worry, you can still use others

After you are done with these 3 steps,

All you have to do is to do research on a particular problem that people are having, create your content based on what you research, get your affiliate link from the affiliate company and offer them a solution.

With affiliate marketing there is no cap to the amount of money you could make

If you do it the right way, there are lots of money to be made.

**There is nothing complicated about it**

you don't need to start looking for friends and family to join your company before you make money

Your potential customers are out there searching for a solution to their problem

You just have to reach them and start your promoting

However, it's not a Get rich quick scheme that will make you money without doing anything..

It's a high income skill that you need to learn and implement before you get a result  
But if you are willing to put in some works, I can guarantee you that this business model will lead to your financial
