

YEAR 11 GEOGRAPHY MODULE 1

Homework 8

Small-scale ecosystems

- Research how a sand dune is created and what conditions are required.

- Describe the formation of a sand dune.

TIP: search 'sand dune formation'

- Research the landscape and wildlife at Camber Sands.

- Write a short description of the different wildlife that can be found at Camber Sands

TIP: search 'camber dunes information'. Use the page eastsussex.gov.uk

- Research human activity at Camber Sands.

- Describe the different human activity occurring at Camber Sands and explain how humans could damage the sand dunes with these activities.

Tip: search '10 things you can do at Camber Sands'

- Research the Camber Sands Management Plan.

- Write a description of how we can save the sand dune ecosystem from human activity. This should be case study specific.

TIP: You can find this information on the 'Camber dunes information' page

- find **MANAGEMENT**

Print off your work and bring it to lesson on the homework due date

OR, write it up on a piece of paper

OR, email it to me before the due date
