

Subject: Stop corruption in office — act now

Dear [Representative/Senator] [Last Name],

I'm writing as your constituent to urge you to take strong, urgent action to stop corruption in office across **all** branches of government.

First, please support and work to **pass the Ban Presidential Plunder of Taxpayer Funds Act and the Don't Settle for Corruption Act**. No president should be able to use taxpayer money or secret Justice Department settlements to shield themselves or their family from accountability.

Second, I urge you to **strengthen and enforce the Emoluments Clause, including against crypto and foreign-money schemes**. Modern corruption flows through digital assets, foreign-linked platforms, and opaque business ventures. Presidents, members of Congress, judges, and other federal officials should not be allowed to personally profit from these while in office.

Third, I ask you to **hold public hearings on Donald Trump's reported multi-billion-dollar crypto and World Liberty Financial windfall and the conflicts of interest it creates**. The public deserves a clear, on-the-record accounting of who is paying, what they expect in return, and how this affects official decisions.

I strongly support tough, across-the-board anti-corruption measures: real enforcement of the Emoluments Clause, strict limits on self-dealing in office, and serious oversight of crypto and foreign-money schemes involving public officials. Please let me know specifically what steps you will take on these points and whether you will support hearings into Trump's crypto fortune and related conflicts of interest.

Sincerely,

[Your Name]
